## Post-payment service-specific reviews

First Coast is tasked with preventing inappropriate Medicare payments. One of the ways this is conducted is through medical review of claims. Medical review of claims helps to ensure that Medicare pays for services that are covered, correctly coded, and medically reasonable and necessary.

First Coast performs data analysis on a regular basis on all services billed to Medicare to identify services that are frequently not billed and coded correctly per Medicare guidelines. Post-pay service-specific reviews are performed based on results of a widespread data analysis that focuses on specific topics.

If you bill Medicare for these services, you may receive an additional development request (ADR) letter asking for documentation. This allows First Coast to validate that you have billed the services correctly according to Medicare guidelines.

Once the ADR is received, you will have 45 days to respond to the request with the supporting medical record documentation.

The review will be completed within 60 days of receipt of the documentation. When the review is completed, you will be notified of the results.

**WHEN EXPERIENCE COUNTS & QUALITY MATTERS**

--------------------------------	----

The *Medicare B Connection* is published monthly by First Coast Service Options Inc.'s Provider Outreach & Education division to provide timely and useful information to Medicare Part B providers.

Articles included in the *Medicare B Connection* represent formal notice of coverage policies. Policies have or will take effect on the date given. Providers are expected to read, understand, and abide by the policies outlined within to ensure compliance with Medicare coverage and payment guidelines.

*CPT® five-digit codes, descriptions, and other data only are copyright 2018 by American Medical Association (or such other date of publication of CPT®). All Rights Reserved. Applicable FARS/DFARS apply. No fee schedules, basic units, relative values or related listings are included in CPT®. AMA does not directly or indirectly practice medicine or dispense medical services. AMA assumes no liability for data contained or not contained herein.*

## About the Medicare B Connection

The *Medicare B Connection* is a comprehensive publication developed by First Coast Service Options Inc. (First Coast) for Part B providers in Florida, Puerto Rico, and the U.S. Virgin Islands and is distributed on a monthly basis.

Important notifications that require communication in between publications will be posted to the First Coast Medicare [provider education website](#). In some cases, additional unscheduled special issues may be posted.

### Who receives the *Connection*

Anyone may view, print, or download the *Connection* from our provider education website(s). Providers who cannot obtain the *Connection* from the internet are required to register with us to receive a complimentary hardcopy.

Distribution of the *Connection* in hardcopy is limited to providers who have billed at least one Part B claim to First Coast Medicare during the twelve months prior to the release of each issue. Providers meeting these criteria are eligible to receive a complimentary copy of that issue, if a technical barrier exists that prevents them from obtaining it from the internet and they have returned a completed registration form to us.

Registration forms must be submitted annually or when you experience a change in circumstances that impacts your electronic access.

For additional copies, providers may purchase a separate annual subscription (see order form in the back of this issue). All issues published since 1997 may be downloaded from the internet, free of charge.

We use the same mailing address for all correspondence, and cannot designate that the *Connection* be sent to a specific person/department within a provider's office. To ensure continued receipt of all Medicare correspondence, providers must keep their addresses current with the Medicare provider enrollment department. Please remember that address changes must be done using the appropriate CMS-855.

### Publication format

The *Connection* is arranged into distinct sections.

- The **Claims** section provides claim submission requirements and tips.
- The **Coverage/Reimbursement** section discusses specific CPT® and HCPCS procedure codes. It is arranged by categories (not specialties). For example,

“Mental Health” would present coverage information of interest to psychiatrists, clinical psychologists and clinical social workers, rather than listing articles separately under individual provider specialties. Also presented in this section are changes to the Medicare physician fee schedule, and other pricing issues.

- The section pertaining to **Electronic Data Interchange (EDI)** submission also includes information pertaining to the Health Insurance Portability and Accountability Act (HIPAA).
- The **Local Coverage Determination** section features summaries of new and revised local coverage determinations (LCDs) developed as a result of either local medical review or comprehensive data analysis initiatives.
- The **General Information** section includes fraud and abuse, and national provider identifier topics, plus additional topics not included elsewhere.
- In addition to the above, other sections include:
- **Educational Resources**, and
- **Contact information** for Florida, Puerto Rico, and the U.S. Virgin Islands.

### The *Medicare B Connection* represents formal notice of coverage policies

Articles included in each edition represent formal notice that specific coverage policies either have or will take effect on the date given. Providers are expected to read, understand, and abide by the policies outlined in this document to ensure compliance with Medicare coverage and payment guidelines.

### Never miss an appeals deadline again

When it comes to submitting a claims appeal request, *timing is everything*. Don't worry – you won't need a desk calendar to count the days to your submission deadline. Try our “*time limit*” calculators on our [Appeals of claim decisions page](#). Each calculator will *automatically calculate* when you must submit your request based upon the date of either the initial claim determination or the preceding appeal level.

## Medicare Part B advance beneficiary notices

Medicare Part B allows coverage for services and items deemed medically reasonable and necessary for treatment and diagnosis of the patient.

For some services, to ensure that payment is made only for medically necessary services or items, coverage may be limited based on one or more of the following factors (this list is not inclusive):

- Coverage for a service or item may be allowed only for specific diagnoses/conditions. Always code to the highest level of specificity.
- Coverage for a service or item may be allowed only when documentation supports the medical need for the service or item.
- Coverage for a service or item may be allowed only when its frequency is within the accepted standards of medical practice (i.e., a specified number of services in a specified timeframe for which the service may be covered).

If the provider believes that the service or item may not be covered as medically reasonable and necessary, the patient must be given an acceptable advance notice of Medicare's possible denial of payment if the provider does not want to accept financial responsibility for the service or item. Advance beneficiary notices (ABNs) advise beneficiaries, before items or services actually are furnished, when Medicare is likely to deny payment.

### Patient liability notice

The Centers for Medicare & Medicaid Services' (CMS) has developed the Advance Beneficiary Notice of Noncoverage (ABN) (Form CMS-R-131), formerly the "Advance Beneficiary Notice." Section 50 of the *Medicare Claims Processing Manual* provides instructions regarding the notice that these providers issue to beneficiaries in advance of initiating, reducing, or terminating what they

believe to be noncovered items or services. The ABN must meet all of the standards found in Chapter 30. Beginning March 1, 2009, the ABN-G and ABN-L was no longer valid; and notifiers must use the revised Advance Beneficiary Notice of Noncoverage (CMS-R-131). [Section 50 of the Medicare Claims Processing Manual](#).

Reproducible copies of Form CMS-R-131 ABNs (in English and Spanish) and other BNI information may be found [here](#).

### ABN modifiers

When a patient is notified in advance that a service or item may be denied as not medically necessary, the provider must annotate this information on the claim (for both paper and electronic claims) by reporting modifier GA (waiver of liability statement on file) or GZ (item or service expected to be denied as not reasonable and necessary) with the service or item.

Failure to report modifier GA in cases where an appropriate advance notice was given to the patient may result in the provider having to assume financial responsibility for the denied service or item.

Modifier GZ may be used in cases where a signed ABN is not obtained from the patient; however, when modifier GZ is billed, the provider assumes financial responsibility if the service or item is denied.

**Note:** Line items submitted with the modifier GZ will be automatically denied and will not be subject to complex medical review.

## GA modifier and appeals

When a patient is notified in advance that a service or item may be denied as not medically necessary, the provider must annotate this information on the claim (for both paper and electronic claims) by reporting the modifier GA (waiver of liability statement on file).

Failure to report modifier GA in cases where an appropriate advance notice was given to the patient may result in the provider having to assume financial responsibility for the denied service or item.

Nonassigned claims containing the modifier GA in which the patient has been found liable must have the patient's written consent for an appeal. Refer to the applicable contact section located at the end of this publication for the address in which to send written appeals requests.

## New LCD/Article

# Implantable continuous glucose monitors (I-CGM) - new Part A and Part B LCD and billing and coding article

## LCD and Article ID numbers: L38664/A58136 (Florida, Puerto Rico/U.S. Virgin Islands)

This new local coverage determination (LCD) addresses coverage indications, limitations, and medical necessity requirements for implantable continuous glucose monitors (I-CGM) for the treatment of Medicare beneficiaries with diabetes mellitus that require multiple daily administrations of insulin and frequent adjustments to their insulin treatment regimen.

Also, the related billing and coding article (A58136) addresses coding guidelines in support of the reasonable and necessary services outlined in the LCD.

## Effective date

This new LCD and related billing and coding article are effective for services rendered **on or after October 11, 2020**. LCDs are available through the CMS Medicare coverage database at <https://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx>.

A billing and coding article for an LCD (when present) may be found by selecting “Related Local Coverage Documents” in the “Section Navigation” drop-down menu at the top of the LCD page.

**Note:** To review active, future and retired LCDs, please [click here](#).

## Revised LCDs/Articles

# Gastrointestinal pathogen (GIP) panels utilizing multiplex nucleic acid amplification techniques (NAATs) - revision to the Part A and Part B billing and coding article

## Article ID number: A56638 (Florida, Puerto Rico/U.S. Virgin Islands)

Based on a review of the local coverage determination (LCD) and billing and coding article for gastrointestinal pathogen (GIP) panels utilizing multiplex nucleic acid amplification techniques (NAATs), the billing and coding article was revised to remove the dual diagnosis requirement for ICD-10-CM diagnosis code R19.7. Therefore, the “CPT®/HCPCS Codes/Group 2 Codes:” section of the billing and coding article was removed (Current Procedural Terminology [CPT®] codes 87507 and 0097U are now listed under the Group 1 Codes) Also, the “ICD-10 Codes that Support Medical Necessity/ Group 2 Codes:” section of the billing and coding article was removed and the “ICD-10 Codes that Support Medical Necessity/Group 3 Codes:” section was renamed to “Group 2 Codes”.

## Effective date

This billing and coding article revision is effective for **claims processed on or after August 13, 2020**, for services rendered **on or after December 30, 2019**. LCDs are available through the CMS Medicare coverage database at <https://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx>.

A billing and coding article for an LCD (when present) may be found by selecting “Related Local Coverage Documents” in the “Section Navigation” drop-down menu at the top of the LCD page.

**Note:** To review active, future and retired LCDs, please [click here](#).

## Application of skin substitute grafts for treatment of DFU and VLU of lower extremities - revision to the Part A and Part B billing and coding article

### Article ID number: A57680 (Florida, Puerto Rico/U.S. Virgin Islands)

Based on review of this billing and coding article, the “Coding Guidance” section was updated to include proper coding information in regards to skin replacement surgery application codes and non-graft wound dressings (e.g., gel, powder, ointment, foam, liquid) or injected skin substitutes.

#### Effective date

This billing and coding article revision is effective for claims

processed on or after August 13, 2020.

LCDs are available through the CMS Medicare coverage database at <https://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx>.

A billing and coding article for an LCD (when present) may be found by selecting “Related Local Coverage Documents” in the “Section Navigation” drop-down menu at the top of the LCD page.

**Note:** To review active, future and retired LCDs, please [click here](#).

### Retired LCDs/Articles

## Hyperbaric oxygen (HBO) therapy - retired Part A and Part B LCD/billing and coding article

### LCD and Article ID numbers: L36504/A57800 (Florida, Puerto Rico/U.S. Virgin Islands)

Based on review of the local coverage determination (LCD) and billing and coding article for hyperbaric oxygen (HBO) therapy, it was determined that they are no longer required and therefore, are being retired.

#### Effective date

This LCD and billing and coding article retirement is effective for services rendered on or after August 27, 2020.

LCDs are available through the CMS Medicare coverage database at

<https://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx>.

A billing and coding article for an LCD (when present) may be found by selecting “Related Local Coverage Documents” in the “Section Navigation” drop-down menu at the top of the LCD page.

**Note:** To review active, future and retired LCDs, please [click here](#).

## Sacral neuromodulation - retired Part B LCD/billing and coding article

### LCD and Article ID numbers: L36296/A56508 (Florida, Puerto Rico/U.S. Virgin Islands)

Based on review of the local coverage determination (LCD) and billing and coding article for sacral neuromodulation, it was determined that they are no longer required and therefore, are being retired.

#### Effective date

This LCD and billing and coding article retirement is effective for services rendered on or after August 13, 2020.

LCDs are available through the CMS Medicare coverage database at

<https://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx>.

A billing and coding article for an LCD (when present) may be found by selecting “Related Local Coverage Documents” in the “Section Navigation” drop-down menu at the top of the LCD page.

**Note:** To review active, future and retired LCDs, please [click here](#).

## Upcoming provider outreach and educational events

### *Medicare Quarterly Updates (B)*

Date: September 16  
 Time: 11 a.m.-12:30 p.m. ET  
 Type of Event: Webcast

### *View our complete calendar of events*

**Note:** Unless otherwise indicated, designated times for educational events are stated as ET, and the focus is to Florida, Puerto Rico, and the U.S. Virgin Islands.

### Two easy ways to register

**Online** – Visit our provider training website at [First Coast University](#), log on to your account and select the course you wish to register. Class materials are available under “My Courses” no later than one day before the event.

**First-time User?** Set up an account by completing [Create User Account Form](#) online. Providers who do not have yet a national provider identifier may enter “99999” in the NPI field. You will receive logon information within 72 hours of your request.

**Fax** – Providers without internet access may request a fax registration form through our Registration Hotline at 1-904-791-8103. Class materials will be faxed to you the day of the event.

#### **Please Note:**

- Pre-registration is required for all teleconferences, webcasts and in-person educational seminars.
- Dates and times are subject to change prior to opening of event registration.

Registrant's Name: \_\_\_\_\_

Registrant's Title: \_\_\_\_\_

Provider's Name: \_\_\_\_\_

Telephone Number: \_\_\_\_\_ Fax Number: \_\_\_\_\_

Email Address: \_\_\_\_\_

Provider Address: \_\_\_\_\_

City, State, ZIP Code: \_\_\_\_\_

Keep checking our [website](#) for details and newly scheduled educational events (teleconferences, webcasts, etc.).

### Never miss a training opportunity

If you or your colleagues were unable to attend one of our past Medicare educational webcasts, you still have the opportunity to learn about the topics covered during the training session. Visit the First Coast Medicare training website, download the recording of the event, and listen to the webcast when you have the time.

### Take advantage of 24-hour access to free online training

In addition to live training events, we also offer you the advantage of self-paced, free online courses that will allow you and your staff to train when and where it is most convenient for you. In addition, our comprehensive course catalog allows you to find the Medicare training that fits your specific needs, and several of our online courses offer CEUs. Learn more on the First Coast Medicare training website and explore our catalog of online courses.

## CMS MLN Connects®

The Centers for Medicare & Medicaid Services (CMS) *MLN Connects*® is an official *Medicare Learning Network*® (MLN) – branded product that contains a week’s worth of news for Medicare fee-for-service (FFS) providers. CMS sends these messages weekly to national health industry provider associations, who then disseminates the *MLN Connects*® to its membership as appropriate.

## MLN Connects - Special Edition – Thursday, July 23, 2020

### Trump Administration Announces New Resources to Protect Nursing Home Residents Against COVID-19

As part of the unprecedented efforts taken by the Trump Administration, President Trump announced several new CMS initiatives designed to protect nursing home residents from Coronavirus Disease 2019 (COVID-19).

“From the moment the threat of this virus materialized, the Trump Administration has placed a priority on protecting nursing home residents,” said CMS Administrator Seema Verma. “Today’s multi-pronged intervention represents the latest efforts in fulfilling that unwavering commitment.

As caseloads continue to increase in areas around the country, it has never been more important that nursing homes have what they need to maintain a sturdy defense against the virus. These measures will help them do exactly that.”

New Funding:

HHS will devote \$5 billion of the [Provider Relief Fund](#) authorized by the Coronavirus Aid, Relief, and Economic Security (CARES) Act to Medicare-certified long term care

facilities and state veterans’ homes (“nursing homes”), to build nursing home skills and enhance nursing homes’ response to COVID-19, including enhanced infection control. This funding could be used to address critical needs in nursing homes including hiring additional staff, implementing infection control “mentorship” programs with subject matter experts, increasing testing, and providing additional services, such as technology so residents can connect with their families if they are not able to visit.

Nursing homes must participate in the Nursing Home COVID-19 Training (described below) to be qualified to receive this funding. This new funding is in addition to the \$4.9 billion previously announced to offset revenue losses and assist nursing homes with additional costs related to responding to the COVID-19 public health emergency and the shipments of personal protective equipment provided to nursing homes by the Federal Emergency Management Agency “President Trump is committed to strengthening Medicare and lowering costs for patients.

Today’s rule advances competition by creating a level playing field for providers so they can compete for patients on the basis of quality and care,” said CMS Administrator Seema Verma.

See **JULY 23**, page 10

## JULY 23

from page 9

“The final policies remove unnecessary and inefficient payment differences so patients can have more affordable choices and options.”

### Enhanced Testing:

Building on the initiative HHS announced last week, in which rapid point-of-care diagnostic testing devices will be distributed to nursing homes, and the new funding from the Provider Relief Fund, CMS will begin requiring, rather than recommending, that all nursing homes in states with a 5% positivity rate or greater test all nursing home staff each week. This new staff testing requirement will enhance efforts to keep the virus from entering and spreading through nursing homes by identifying asymptomatic carriers.

More than 15,000 testing devices will be deployed over the next few months to help support this mandate, with over 600 devices shipping this week. Funds from the Provider Relief Fund can also be used to pay for additional testing of visitors.

### Additional Technical Assistance & Support:

The Trump administration recently deployed federal Task Force Strike Teams to provide onsite technical assistance and education to nursing homes experiencing outbreaks in an effort to help reduce transmission and the risk of COVID-19 spread among residents.

The first deployments took place in 18 nursing homes in Illinois, Florida, Louisiana, Ohio, Pennsylvania and Texas between July 18 and July 20. The Task Force Strike Teams are composed of clinicians and public health service officials from CMS, the Centers for Disease Control & Prevention (CDC), and the Office of the Assistant Secretary for Health.

The Task Force Strike Teams went into nursing homes based on data they reported to the CDC that indicated an increase in COVID-19 cases. The teams focused on the four key areas of support, including keeping COVID-19 out of facilities, detecting COVID-19 cases quickly, preventing virus transmission, and managing staff.

The goal was to determine what immediate actions nursing homes needed to take to help reduce the spread and risk of COVID-19 among residents, and to better understand what federal, state, and local resources nursing homes need to ensure the health and safety of their residents. CMS and its partners plan to use what is learned on the ground to determine remote education and other critical needs to support nursing homes and mitigate future outbreaks.

In addition, CMS, in partnership with the CDC, is rolling out an online, self-paced, on-demand Nursing Home COVID-19 Training focused on infection control and best practices.

The training being offered has 23 educational modules and a scenario-based learning modules that include materials on cohorting strategies and using telehealth in nursing homes to assist facilities as they continue to work to mitigate the virus spread in their facilities.

This program supplements training already underway to better equip nursing homes to contain and stop the spread of COVID-19.

The training is a requirement for nursing homes to receive the additional funding from the Provider Relief Fund Program.

The training will be available to all 15,400 nursing homes nationwide along with specialized technical assistance to nursing homes who have been found to have infection prevention deficiencies in their most recent CMS inspection and had recent COVID-19 cases based upon their data submissions to CDC.

A certificate of completion is offered and recognition badges can be downloaded for nursing homes to display on their website.

### Weekly Data on High Risk Nursing Homes:

Early on during this pandemic, CMS required nursing homes to inform residents, their families and representatives of COVID-19 cases in their nursing homes. Starting in May, CMS and CDC began collecting weekly data on each nursing home including their number of COVID-19 cases.

Now that this data collection process has matured, the White House and CMS will release a list of nursing homes with an increase in cases that will be sent to states each week as part of the weekly Governor’s report to ensure states have the information needed to target their support to the highest risk nursing homes.

This announcement builds on the unprecedented and aggressive actions CMS has taken to address the impact of COVID-19 in nursing homes.

See the full text of this excerpted [CMS Press Release](#) (issued July 22), including a list of actions CMS took to address the impact of COVID-19 in nursing homes.

### CMS and CDC Announce Provider Reimbursement Available for Counseling Patients to Self-Isolate at Time of COVID-19 Testing

On July 30, CMS and the Centers for Disease Control and Prevention (CDC) are announcing that payment is available to physicians and health care providers to counsel patients, at the time of Coronavirus Disease 2019 (COVID-19) testing, about the importance of self-isolation after they are tested and prior to the onset of symptoms.

The transmission of COVID-19 occurs from both symptomatic, pre-symptomatic, and asymptomatic individuals emphasizing the importance of education on self-isolation as the spread of the virus can be reduced significantly by having patients isolated earlier, while waiting for test results or symptom onset.

The CDC models show that when individuals who are

tested for the virus are separated from others and placed in quarantine, there can be up to an 86 percent reduction in the transmission of the virus compared to a 40 percent decrease in viral transmission if the person isolates after symptoms arise.

Provider counseling to patients, at the time of their COVID-19 testing, will include the discussion of immediate need for isolation, even before results are available, the importance to inform their immediate household that they too should be tested for COVID-19, and the review of signs and symptoms and services available to them to aid in isolating at home. In addition, they will be counseled that if they test positive, to wear a mask at all times, and they will be contacted by public health authorities and asked to provide information for contact tracing and to tell their immediate household and recent contacts in case it is appropriate for these individuals to be tested for the virus and to self-isolate as well.

CMS will use existing evaluation and management payment codes to reimburse providers who are eligible to bill CMS for counseling services no matter where a test is administered, including doctor's offices, urgent care clinics, hospitals, and community drive-thru or pharmacy testing sites.

## JULY 30

from page 11

### **CMS Announces New Hospital Procedure Codes for Therapeutics in Response to the COVID-19 Public Health Emergency**

With the emergence of Coronavirus Disease 2019 (COVID-19) and the new treatments that have followed, it is critical to be able to track the use of these treatments and their effectiveness in real-time. CMS responded to this need, and in record time is implementing new procedure codes to allow Medicare and other insurers to identify the use of the therapeutics remdesivir and convalescent plasma for treating hospital in-patients with COVID-19. These new codes, which go into effect August 1, will enable CMS to conduct real-time surveillance and obtain real-world evidence in how these drugs are working and provide critical information on their effectiveness and how they can protect patients. These codes can be reported to Medicare and other insurers may also use the codes to identify the use of COVID-19 therapies and help facilitate monitoring and data collection on their use.

These new codes are being implemented into the International Classification of Diseases, Tenth Revision, Procedure Coding System (ICD-10-PCS). ICD-10-PCS is the Health Insurance Portability and Accountability Act (HIPAA) designated code set for reporting hospital inpatient procedures, which is developed and maintained by CMS and can be used by other health insurers.

The implementation of these new procedure codes is part of the Trump Administration's ongoing efforts to protect the health and safety of COVID-19 patients across the country during the public health emergency.

For more information, see [ICD-10 MS-DRGs Version 37.2 Effective August 1](#).

### **Trump Administration Continues to Keep Out-of-Pocket Drug Costs Low for Seniors**

On July 29, CMS announced the average basic premium for Medicare Part D prescription drug plans, which cover prescription drugs that beneficiaries pick up at a pharmacy. Under the leadership of President Trump, for the first time seniors that use insulin will be able to choose a prescription drug plan in their area that offers a broad set of insulins for no more than \$35 per month per prescription.

The average basic Part D premium will be \$30.50 in 2021. The 2021 and 2020 average basic premiums are the second lowest and lowest, respectively, average basic premiums in Part D since 2013. This trend of lower Part D premiums, which have decreased by 12 percent since 2017, means that beneficiaries have saved nearly \$1.9 billion in premium costs over that time. Further, Part D continues to be an extremely popular program, with enrollment increasing by 16.7 percent since 2017.

“At every turn, the Trump Administration has prioritized policies that introduce choice and competition in Part D,”

said CMS Administrator Seema Verma. “The result is lower prices for life-saving drugs like insulin, which will be available to Medicare beneficiaries at this fall's Open Enrollment for no more than \$35 a month. In short, Part D premiums continue to stay at their lowest levels in years even as beneficiaries enjoy a more robust set of options from which to choose a plan that meets their needs.”

In addition to the \$1.9 billion in premium savings for beneficiaries since 2017, the Trump Administration has produced substantial Part D program savings for taxpayers. With about 200 additional standalone prescription drug plans and 1,500 additional Medicare Advantage plans with prescription drug coverage joining the program between 2017 and 2020, and that trend expected to continue in 2021, increased market competition has led to lower costs and lower Medicare premium subsidies, which has saved taxpayers approximately \$8.5 billion over the past four years.

Earlier this year, CMS launched the Part D Senior Savings Model, which will allow Medicare beneficiaries to choose a plan that provides access to a broad set of insulins at a maximum \$35 copay for a month's supply. Starting January 1, 2021, beneficiaries who select these plans will save, on average, \$446 per year, or 66 percent, on their out-of-pocket costs for insulin. Beneficiaries will be able to choose from more than 1,600 participating standalone Medicare Part D prescription drug plans and Medicare Advantage plans with prescription drug coverage, all across the country this open enrollment period, which runs from October 15 through December 7. And because the majority of participating Medicare Advantage plans with prescription drug coverage do not charge a Part D premium, beneficiaries who enroll in those plans will save on insulin and not pay any extra premiums.

In January 2020, CMS, through the Part D Payment Modernization Model, offered an innovative new opportunity for Part D plan sponsors to lower costs for beneficiaries, while improving care quality. Under this model, Part D sponsors can better manage prescription drug costs through all phases of the Part D benefit, including the catastrophic phase. Through the use of better tools and program flexibilities, sponsors are better able to negotiate on high cost drugs and design plans that increase access and lower out-of-pocket costs for beneficiaries. For CY 2021, there will be nine plan options in Utah, New Mexico, Idaho and Pennsylvania that participate in this model.

In Medicare Part D, beneficiaries choose the prescription drug plan that best meets their needs, and plans have to improve quality and lower costs to attract beneficiaries. This competitive dynamic sets up clear incentives that drive towards value. CMS has taken steps to modernize the Part D program by providing beneficiaries the opportunity to choose among plans with greater negotiating tools that have been developed in the private

See **JULY 30**, page 13

## JULY 30

from page 12

market and by providing patients with more transparency on drug prices. Improvements to the Medicare Part D program that CMS has made to date include:

- Beginning in 2021, providing more information on out-of-pocket costs for prescription drugs to beneficiaries by requiring Part D plans to provide a real time benefit tool to clinicians with information that they can discuss with patients on out-of-pocket drug costs at the time a prescription is written
- Implementing Part D legislation signed by President Trump to prohibit “gag clauses,” which keep pharmacists from telling patients about lower-cost ways to obtain prescription drugs
- Beginning in 2021, requiring the Explanation of Benefits document that Part D beneficiaries receive each month to include information on drug price increases and lower-cost therapeutic alternatives
- Providing beneficiaries with more drug choices and empowering beneficiaries to select a plan that meets their needs by allowing plans to cover different prescription drugs for different indications, an approach used in the private sector
- Reducing the maximum amount that low-income beneficiaries pay for certain innovative medicines known as “biosimilars,” which will lower the out-of-pocket cost of these innovative medicines for these beneficiaries

- Empowering Medicare Advantage to negotiate lower costs for physician-administered prescription drugs for seniors for the first time, as well allowing Part D plans to substitute certain generic drugs on plan formularies more quickly during the year, so beneficiaries immediately have access to the generic, which typically has lower cost sharing than the brand
- Increasing competition among plans by removing the requirement that certain Part D plans have to “meaningfully differ” from each other, making more plan options available for beneficiaries

### FY 2021 Medicare payment policies for IPFs, SNFs, and hospices

- [CMS Updates Medicare Payment Policies for IPFs, SNFs, and Hospices](#)
- [COVID-19: Coverage of Physician Telehealth Services Provided to SNF Residents](#)

### CMS updates Medicare payment policies for IPFs, SNFs, and hospices

On July 31, CMS finalized three Medicare payment rules that further advance our efforts to strengthen the Medicare program by better aligning payments for Inpatient Psychiatric Facilities (IPFs), Skilled Nursing Facilities (SNFs), and hospices.

Inpatient Psychiatric Facilities:

The final rule updates Medicare payment policies and rates for the IPF Prospective Payment System (PPS) for FY 2021.

In this final rule, CMS is finalizing a 2.2 percent payment rate update and finalizing its proposal to adopt revised Office of Management and Budget (OMB) statistical

area delineations resulting in wage index values being more representative of the actual costs of labor in a given area. CMS is finalizing updates to allow advanced practice providers, including physician assistants, nurse practitioners, psychologists, and clinical nurse specialists to operate within the scope of practice allowed by state law by documenting progress notes in the medical record of patients for whom they are responsible, receiving services in psychiatric hospitals.

Skilled Nursing Facilities:

The final rule updates the Medicare payment rates and the quality programs for SNFs. These updates include routine technical rate-setting updates to the SNF PPS payment rates, as well as finalizes adoption of the most recent OMB statistical area delineations and applies a 5 percent cap on wage index decreases from FY 2020 to FY 2021.

CMS is also finalizing changes to the ICD-10 code mappings that would be effective beginning in FY 2021 in response to stakeholder feedback. CMS projects aggregate payments to SNFs will increase by \$750 million, or 2.2 percent, for FY 2021, compared to FY 2020.

See **JULY 31**, page 14

## JULY 31

from page 13

### Hospices:

For FY 2021, hospice payment rates are updated by the market basket percentage increase of 2.4 percent (\$540 million).

Hospices that fail to meet quality reporting requirements receive a 2 percentage point reduction to the annual market basket percentage increase for the year.

The hospice payment system includes a statutory aggregate cap.

The aggregate cap limits the overall payments made to a hospice annually.

The final hospice cap amount for the FY 2021 cap year is \$30,683.93, which is equal to the FY 2020 cap amount (\$29,964.78) updated by the final FY 2021 hospice payment update percentage of 2.4 percent.

- [Trump Administration Proposes to Expand Telehealth Benefits Permanently for Medicare Beneficiaries Beyond the COVID-19 Public Health Emergency and Advances Access to Care in Rural Areas](#)
- [Trump Administration Proposes Policies to Provide Seniors with More Choices and Lower Costs for Surgeries](#)
- [CMS Updates Medicare Payment Policies for IRFs](#)

### Trump Administration Proposes to Expand Telehealth Benefits Permanently for Medicare Beneficiaries Beyond the COVID-19 Public Health Emergency and Advances Access to Care in Rural Areas

CMS is proposing changes to expand telehealth permanently, consistent with the Executive Order on Improving Rural and Telehealth Access that President Trump signed. The Executive Order and proposed rule advance our efforts to improve access and convenience of care for Medicare beneficiaries, particularly those living in rural areas. Additionally, the proposed rule implements a multi-year effort to reduce clinician burden under our Patients Over Paperwork initiative and to ensure appropriate reimbursement for time spent with patients. This proposed rule also takes steps to implement President Trump's Executive Order on Protecting and Improving Medicare for our Nation's Seniors and continues our commitment to ensure that the Medicare program is sustainable for future generations.

Expanding Beneficiary Access to Care through Telehealth:

### COVID-19: Coverage of physician telehealth services provided to SNF residents

The current COVID-19 Public Health Emergency (PHE) does not waive any requirements related to Skilled Nursing Facility (SNF) Consolidated Billing (CB); however, CMS added CPT codes 99441, 99442, and 99443, to the [list of telehealth codes](#) coverable under the waiver during the COVID-19 PHE. These codes designate three different time increments of telephone evaluation and management service provided by a physician. You can bill for these physician services separately under Part B when furnished to a SNF's Part A resident.

Medicare Administrative Contractors (MACs) will reprocess claims for CPT codes 99441, 99442, and 99443 with dates of service on or after March 1, 2020, that were denied due to SNF CB edits. You do not have to do anything. If you already received payment from the SNF for these physician services, return that payment to the SNF once the MAC reprocesses your claim.

The Medicare Learning Network®, MLN Connects®, and MLN Matters® are registered trademarks of the U.S. Department of Health and Human Services (HHS).

Over the last three years, as part of the Fostering Innovation and Rethinking Rural Health strategic initiatives, CMS has been working to modernize Medicare by unleashing private sector innovations and improve beneficiary access to services furnished via telecommunications technology. Starting in 2019, Medicare began paying for virtual check-ins, meaning patients across the country can briefly connect with doctors by phone or video chat to see whether they need to come in for a visit. In response to the COVID-19 pandemic, CMS moved swiftly to significantly expand payment for telehealth services and implement other flexibilities so that Medicare beneficiaries living in all areas of the country can get convenient and high-quality care from the comfort of their home while avoiding unnecessary exposure to the virus. Before the Public Health Emergency (PHE), only 14,000 beneficiaries received a Medicare telehealth service in a week, while over 10.1 million beneficiaries have received a Medicare telehealth service during the PHE from mid-March through early-July. For more information on Medicare's unprecedented increases in telemedicine and its impact on the health care delivery system, visit the [CMS Health Affairs blog](#).

As directed by President Trump's Executive Order on Improving Rural and Telehealth Access, through this rule, CMS is taking steps to extend the availability of certain telemedicine services after the PHE ends, giving Medicare beneficiaries more convenient ways to access health care particularly in rural areas where access to health care providers may otherwise be limited.

See **AUGUST 4**, page 15

## AUGUST 4

from page 14

“Telemedicine can never fully replace in-person care, but it can complement and enhance in-person care by furnishing one more powerful clinical tool to increase access and choices for America’s seniors,” said CMS Administrator Seema Verma. “The Trump Administration’s unprecedented expansion of telemedicine during the pandemic represents a revolution in health care delivery, one to which the health care system has adapted quickly and effectively. Never one merely to tinker around the edges when it comes to patient-centered care, President Trump will not let this opportunity slip through our fingers.”

During the PHE, CMS added 135 services such as emergency department visits, initial inpatient and nursing facility visits, and discharge day management services that could be paid when delivered by telehealth. CMS is proposing to permanently allow some of those services to be done by telehealth, including home visits for the evaluation and management of a patient (in the case where the law allows telehealth services in the patient’s home) and certain types of visits for patients with cognitive impairments.

CMS is seeking public input on other services to permanently add to the telehealth list beyond the PHE in order to give clinicians and patients time as they get ready to provide in-person care again. CMS is also proposing to temporarily extend payment for other telehealth services, such as emergency department visits for a specific time period, through the calendar year in which the PHE ends. This will also give the community time to consider whether these services should be delivered permanently through telehealth outside of the PHE.

**Prioritizing Investment in Preventive Care and Chronic Disease Management:**

Under our Patients Over Paperwork initiative, the Trump Administration has taken steps to eliminate burdensome billing and coding requirements for Evaluation and Management (E/M) (for office/outpatient visits) that make up 20 percent of the spending under the Physician Fee Schedule.

These billing and documentation requirements for E/M codes were established 20 years ago and have been subject to longstanding criticism from clinicians that they do not reflect current care practices and needs. After extensive stakeholder collaboration with the American Medical Association and others, simplified coding and billing requirements for E/M visits will go into effect January 1, 2021, saving clinicians 2.3 million hours per year in burden reduction. As a result of this change, clinicians will be able to make better use of their time and restore the doctor-patient relationship by spending less time on documenting visits and more time on treating their patients.

Additionally, last year, the Trump Administration finalized historic changes to increase payment rates for office/

outpatient E/M visits beginning in 2021. The higher payment for E/M visits takes into account the changes in the practice of medicine, recognizing that additional resources are required of clinicians to take care of their Medicare patients, of which two-thirds have multiple chronic conditions. The prevalence of certain chronic conditions in the Medicare population is growing. For example, as of 2018, 68.9% of beneficiaries have 2 or more chronic conditions. In addition, between 2014 and 2018, the percent of beneficiaries with 6 or more chronic conditions has grown from 14.3% to 17.7%.

In this rule, CMS is proposing to similarly increase the value of many services that are comparable to or include office/outpatient E/M visits, such as maternity care bundles, emergency department visits, end-stage renal disease capitated payment bundles, physical and occupational therapy evaluation services, and others. The proposed adjustments, which implement recommendations from the American Medical Association, help to ensure that CMS is appropriately recognizing the kind of care where clinicians need to spend more face-to-face time with patients, like primary care and complex or chronic disease management.

**Bolstering the Health Care Workforce/Patients Over Paperwork:**

CMS is also taking steps to ensure that health care professionals can practice at the top of their professional training. During the COVID-19 public health emergency, CMS announced several temporary changes to expand workforce capacity and reduce clinician burden so that staffing levels remain high in response to the pandemic. As part of its Patients over Paperwork initiative to reduce regulatory burden for providers, CMS is proposing to make some of these temporary changes permanent following the PHE. Such proposed changes include:

- Nurse practitioners, clinical nurse specialists, physician assistants, and certified nurse-midwives (instead of only physicians) to supervise others performing diagnostic tests consistent with state law and licensure, providing that they maintain the required relationships with supervising/collaborating physicians as required by state law
- Clarifying that pharmacists can provide services as part of the professional services of a practitioner who bills Medicare
- Allowing physical and occupational therapy assistants (instead of only physical and occupational therapists) to provide maintenance therapy in outpatient settings
- Allowing physical or occupational therapists, speech-language pathologists, and other clinicians who directly bill Medicare to review and verify (sign and date), rather than re-document, information already entered by other members of the clinical team into a patient’s medical record

### Trump Administration Proposes Policies to Provide Seniors with More Choices and Lower Costs for Surgeries

Outpatient Prospective Payment System (OPPS) & Ambulatory Surgical Center (ASC) proposed rule advances CMS' commitment to increasing competition

As directed by President Trump's Executive Order on Protecting and Improving Medicare for Our Nation's Seniors, CMS is proposing several policies that would give Medicare beneficiaries more choices in where they seek care and lower their out-of-pocket costs for surgeries. The proposed rule takes steps that would allow hospitals and ambulatory surgical centers to operate with better flexibility and patients to have what they need to make informed decisions on where they receive care.

"President Trump's mandate is to put patients and doctors back in charge of health care," said CMS Administrator Seema Verma. "Following through on that mandate entails loosening the stranglehold of government control that has accumulated over decades. Surgeries can be expensive. Patients should have as many options as possible for lowering their costs while getting quality care. These proposed changes, if finalized, would do exactly that, help put patients and doctors back in the driver's seat and in a position to make decisions about their own care."

For patients having surgery, hospital outpatient departments are subject to the same quality and safety standards as inpatient settings under Medicare rules. With this in mind, for 2021, CMS proposes to expand the number of procedures that Medicare would pay for in the hospital outpatient setting by eliminating the "Inpatient Only list," which includes procedures for which Medicare will only make payment when performed in the hospital inpatient setting.

This proposed change would remove regulatory barriers to give beneficiaries the choice to receive these services in a lower cost setting and convenience to go home as early as the same day after a procedure, when their clinician decides such a setting is appropriate. CMS would phase-in this proposal over three years and would gradually allow over 1,700 additional services to be paid when furnished in the hospital outpatient setting. In 2021, approximately 300 musculoskeletal services (such as certain joint

replacement procedures) would be newly payable in the hospital outpatient setting. The proposed change would be the largest one-time reduction to the Inpatient Only list by far; from 2017 through 2020, approximately 30 services total were removed from the Inpatient Only list.

Medicare pays for most services furnished in ASCs at a lower rate than hospital outpatient departments. As a result, when receiving care in an ASC rather than a hospital outpatient department, patients can potentially lower their out-of-pocket costs for certain services. For example, for one of the most common cataract surgeries, currently, on average, a Medicare beneficiary pays \$101 if the procedure is done in a hospital outpatient department compared to \$51 if done in a surgery center.

CMS proposes to expand the number of procedures that Medicare would pay for when performed in an ASC, which would give patients more choices in where they receive care and ensure CMS does not favor one type of care setting over another. For CY 2021, we propose to add eleven procedures that Medicare would pay for when provided in an ASC, including total hip arthroplasty. Since 2018, CMS has added 28 procedures to the list of surgical services that can be paid under Medicare when performed in ASCs.

Additionally, we propose two alternatives that would further expand our goals of increasing access to care at a lower cost. Under the first alternative, CMS would establish a process where the public could nominate additional services that could be performed in ASCs based on certain quality and safety parameters. Under the other proposed alternative, we would revise the criteria used to determine the procedures that Medicare would pay for in an ASC, potentially adding approximately 270 procedures that are already payable when performed in the hospital outpatient setting to the ASC list. Under this alternative, we solicit comment on whether the ASC conditions for coverage (the baseline health and safety requirements for Medicare-participating ASCs) should be revised given the potential for a significant expansion in the nature of services that would be added under this alternative proposal.

See **AUGUST 4**, page 17

## AUGUST 4

from page 16

As part of the Trump Administration's commitment to lowering drug prices, CMS is proposing a change that would lower beneficiaries' out-of-pocket drug costs for certain hospital outpatient drugs. In 2018 and 2019, CMS implemented a payment policy to help beneficiaries save on coinsurance for drugs that were administered at hospital outpatient departments and acquired through the 340B program, which allows certain hospitals to buy outpatient drugs at lower costs. Due to CMS' policy change, which was recently upheld by the United States Court of Appeals for the D.C Circuit, Medicare beneficiaries now benefit from the steep discounts that 340B-enrolled hospitals receive when they purchase drugs through the 340B program.

For 2021, CMS would provide even larger discounts for beneficiaries by proposing to further reduce the payment rate for drugs purchased through the 340B Program based on hospital survey data on drug acquisition costs. CMS is proposing to pay for 340B acquired drugs at average sales price minus 28.7 percent. With this proposed change, CMS estimates that, in 2021, Medicare beneficiaries would save an additional \$85 million on out-of-pocket payments for these drugs and that OPSS payments for 340B drugs would be reduced by approximately \$427 million. The savings from this change would be reallocated on an equal percentage basis to all hospitals paid under the OPSS. We propose that children's hospitals, certain cancer hospitals, and rural sole community hospitals would continue to be exempted from these drug payment reductions. In the alternative, and in light of the court's recent decision, we propose to continue our current policy of paying ASP minus 22.5% for 340B drugs.

In continuing the agency's Patients Over Paperwork Initiative to reduce burden for health care providers, CMS is proposing to establish, update, and simplify the methodology to calculate the Overall Hospital Quality Star Rating (Overall Star Rating) beginning with CY 2021. The Overall Star Rating summarizes a variety of quality measures published on the Medicare.gov Hospital Compare tool for common conditions that hospitals treat, such as heart attacks or pneumonia. Along with publicly reported data on Hospital Compare, the Overall Star Rating helps patients make better informed health care decisions.

Responding to stakeholder feedback about the current methodology used to calculate the Overall Star Rating, CMS is proposing revisions on how to calculate the ratings and grouping hospitals in the Readmission measure group by the hospital's percentage of patients who are dually enrolled in Medicare and Medicaid, which would help provide better insight on health disparities. These and other proposed changes are intended to reduce provider burden, improve the predictability of the star ratings, and make it easier to compare ratings between similar hospitals.

As part of the agency's Rethinking Rural Health Initiative, in the FY 2020 Inpatient Prospective Payment System (IPPS) final rule, CMS increased the wage index for certain low wage index hospitals for at least four years, beginning in FY 2020. In the CY 2020 OPSS/ASC Payment System final rule, CMS adopted changes to the wage index for outpatient hospitals as were finalized in the FY 2020 IPPS final rule, including the increase in wage index for certain low wage index hospitals. The OPSS wage index adjusts hospital outpatient payment rates to account for local differences in wages that hospitals face in their respective labor markets. For 2021, under the OPSS, CMS proposes to continue to adopt the IPPS post-reclassified wage index, including the wage index increase for certain low wage index hospitals. The increase would address a common concern that the current wage index system contributes to disparities between high and low wage index hospitals. Overall, CMS estimates that payment for outpatient services in rural hospitals across the country would increase by 3 percent, which is 0.5 percent higher than the national average increase of 2.5 percent.

For More Information:

- [Proposed Rule](#)
- [Fact Sheet](#)

### CMS Updates Medicare Payment Policies for IRFs

On August 4, CMS finalized a Medicare payment rule that further advances our efforts to strengthen the Medicare program by better aligning payments for Inpatient Rehabilitation Facilities (IRFs). The final rule updates Medicare payment policies and rates for facilities under the IRF Prospective Payment System (PPS) for FY 2021. This final rule also includes making permanent the regulatory change to eliminate the requirement for physicians to conduct a post admission visit since much of the information is included in the pre-admission visit. This flexibility was offered during the Coronavirus Disease 2019 (COVID-19) Public Health Emergency (PHE), and the rule would make this flexibility permanent beyond the expiration of the PHE. In recognition of the interdisciplinary role that non-physician practitioners are currently performing with patients in the IRF, CMS is also finalizing that a non-physician practitioner may perform one of the three required visits in lieu of the physician in the second and later weeks of a patient's care when consistent with the non-physician practitioner's state scope of practice. Additionally, for FY 2021, CMS is updating the IRF PPS payment rates by 2.4 percent.

## Order form for Medicare Part B materials

The following materials are available for purchase. To order these items, please complete and **submit this form along with your check/money order** payable to First Coast Service Options Inc. account # (use appropriate account number). Do not fax your order; it must be mailed.

**Note:** Payment for fee schedules cannot be combined with payment for other items; separate payments are required for purchases of items from different accounts.

Item	Acct Number	Cost per item	Quantity	Total cost
<b>Part B subscription</b> – The Medicare Part B jurisdiction N publications, are available free of charge online in <i>English</i> or <i>Spanish</i> . Nonprovider entities or providers who need additional copies may purchase an annual subscription. This subscription includes all issues published from October 2019 through September 2020.	40300260	\$33		
<b>2020 fee schedule</b> – The Medicare Part B Physician and Nonphysician Practitioner Fee Schedules, effective for services rendered January 1 through December 31, 2020, are available free of charge online in <i>English</i> or <i>Spanish</i> . Additional copies are available for purchase. The fee schedules contain payment rates for all localities. These items do not include the payment rates for injectable drugs, clinical lab services, mammography screening, or DMEPOS items.  <b>Note:</b> Requests for hard copy paper disclosures will be completed as soon as CMS provides the direction to do so. Revisions to fees may occur; these revisions will be published in future editions of the Medicare Part B publication.	40300270	\$12		
Language preference: <b>English</b> [ ] <b>Español</b> [ ]				
<i>Please write legibly</i>			Subtotal	\$
			Tax ( <i>add % for your area</i> )	\$
			Total	\$
