Medicare Fee-For-Service

Standard Companion Guide
Trading Partner Information

Instructions related to Transactions
defined on ASC X12 Implementation
Guides, version 005010

Companion Guide Version Number: 4.0B

May 12, 2017

© First Coast Service Options Inc.
Preface

Companion Guides (CG) may contain two types of data, instructions for electronic communications with the publishing entity (Trading Partner Information) and supplemental information for creating transactions for the publishing entity while ensuring compliance with the associated ASC X12 Implementation Guide (IG) (Transaction Instructions). Either the Trading Partner Information component or the Transaction Instruction component must be included in every CG. The components may be published as separate documents or as a single document.

The Trading Partner Information component is included in the CG when the publishing entity wants to convey the information needed to commence and maintain communication exchange.

The Transaction Instruction component is included in the CG when the publishing entity wants to clarify the IG instructions for submission of specific electronic transactions. The Transaction Instruction component content is limited by ASCX12’s copyrights and Fair Use statement.

Trading Partner Information

1. Introduction

1.1 Purpose

This document is intended to provide information from the author of this guide to trading partners to give them the information they need to exchange EDI data with the author. This includes information about registration, testing, support, and specific information about control record setup.

An Electronic Data Interchange (EDI) Trading Partner is defined as any Medicare customer (e.g., provider/supplier, billing service, clearinghouse or software vendor) that transmits to, or receives electronic data from Medicare. Medicare’s EDI transaction system supports transactions adopted under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) as well as additional supporting transactions as described in this guide.

Medicare FFS is publishing this Companion Guide to clarify, supplement and further define specific data content requirements to be used in conjunction with, and not in place of, the ASCX12N TR3s for all transactions mandated by HIPAA and/or adopted by Medicare FFS for EDI.

This Companion Guide provides communication, connectivity and transaction specific information to Medicare FFS trading partners and serves as the authoritative source for Medicare FFS specific EDI protocols.

1.2 Scope

EDI addresses how providers/suppliers, or their business associates, exchange professional and institutional claims, claim acknowledgments, claim remittance advice, claim status inquiry and responses, and eligibility inquiry and responses electronically with Medicare. This guide also applies to electronic transactions that are being exchanged with Medicare by third parties, such as clearinghouses, billing services or network service vendors. Below is a listing of transactions required by Medicare FFS:
<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Technical specifications for the 999 Implementation Acknowledgement for Health Care Insurance and 277CA Claim Acknowledgement are subsumed under the technical specifications for the 837 Institutional and Professional Claim transaction.

NCPDP Version D.0 also has its own companion guide that can be found at: http://www.ngscedi.com/.

Trading partners choosing to utilize the Hypertext Transfer Protocol Secure (HTTPS) Council for Affordable Quality Healthcare (CAQH) Committee on Operating Rules (Core) compliant connection for EDI must have the following in order to connect:

- Purchase an X.509 certificate which must be recertified at intervals defined by the certificate authority
- Contract with an approved NSV to send the initial valid X.509 certificate via SFTP
- Develop or obtain a CAQH CORE connectivity Rule 270-compliant client software

The connectivity guide for the HTTPS CAQH CORE compliant rule can be found here, https://medicare.fcso.com/EDI_resources/0372270.asp.
For additional information on the HTTPS CAQH CORE compliant rule visit https://www.caqh.org/core.

1.3 Overview
This Companion Guide includes information needed to commence and maintain communication exchange with Medicare. In addition, this Companion Guide has been written to assist you in designing and implementing transaction standards to meet Medicare’s processing standards. This information is organized in the sections listed below:

- **Getting Started**: This section includes information related to hours of operation, data services, and audit procedures. Information concerning Trading Partner registration and the Trading Partner testing process is also included in this section.

- **Testing and Certification Requirements**: This section includes detailed transaction testing information as well as certification requirements needed to complete transaction testing with Medicare.

- **Connectivity/Communications**: This section includes information on Medicare’s transmission procedures as well as communication and security protocols.

- **Contact Information**: This section includes EDI customer service, EDI technical assistance, provider services and applicable Websites.

- **Control Segments/Envelopes**: This section contains information needed to create the ISA/IEA, GS/GE and ST/SE control segments for transactions to be submitted to Medicare.

- **Acknowledgments and Reports**: This section contains information on all transaction acknowledgments sent by Medicare and report inventory.

- **Additional Trading Partner Information**: This section contains information related to implementation checklist, transmission examples, Trading Partner Agreements and other resources.

- **Trading Partner Information Change Summary**: This section describes the differences between the current Companion Guide and the previous Companion Guide(s).

- Medicare FFS EDI Operations
  http://www.cms.gov/ElectronicBillingEDITrans/
2. Getting Started

2.1 Working Together

First Coast Service Options Inc. (First Coast) is dedicated to providing several communication channels to ensure communication remains constant and efficient. First Coast has several options in an effort to assist the community with their electronic data exchange needs. By using any of these methods First Coast is focused on supplying the Trading Partner community with a variety of support tools.

An EDI help desk is established for the first point of contact for basic information and troubleshooting. The help desk is available to support most EDI questions/incidents while at the same time being structured to triage each incident if more advanced research is needed. An EDI email is also accessible as a method of communicating with First Coast. The email account is monitored by knowledgeable staff ready to assist you. When communicating via email, please exclude any Protected Health Information (PHI) to ensure security is maintained. In addition to the First Coast EDI help desk and email access, feel free to communicate via alternative methods (see section 5 below for contact information).

First Coast also has several external communication components in place to reach out to the trading partner community. First Coast posts all critical updates, system issues and EDI specific billing material to their website, [http://medicare.fcso.com](http://medicare.fcso.com). All Trading Partners are encouraged to visit this page to ensure familiarity with the content of the site. First Coast distributes EDI information which is posted on the website on a regular basis. In addition to the website, a distribution list has been established in order to broadcast urgent messages. Please register for First Coast’s distribution list by signing up for eNews at [https://medicare.fcso.com/Header/137525.asp](https://medicare.fcso.com/Header/137525.asp).

2.2 Trading Partner Registration

An EDI Trading Partner is any entity (provider, billing service, clearinghouse, software vendor, employer group, financial institution, etc.) that transmits electronic data to or receives electronic data from another entity.

Medicare FFS, and First Coast support many different types of trading partners or customers for EDI transactions. To ensure proper registration it is important to understand the terminology associated with each customer type.
A **Submitter** is the entity that owns the submitter ID associated with the healthcare data being submitted. It is most likely the provider, hospital, clinic, supplier, etc., but could also be a third party submitting on behalf of one of these entities. However, a submitter must be directly linked to each billing NPI. Often the terms submitter and trading partner are used interchangeably because a **Trading Partner** is defined as the entity engaged in the exchange or transmission of electronic transactions. Thus, the entity that is submitting electronic administrative transactions to First Coast is a Medicare FFS trading partner.

**Provider/Supplier** – the entity that renders services to beneficiaries and submits health care claims to Medicare.

A **Vendor** is an entity that provides hardware, software and/or ongoing technical support for covered entities. In EDI, a vendor can be classified as a software vendor, billing or network service vendor or clearinghouse.

**Software Vendor** – an entity that creates software used by billing services, clearinghouses and providers/suppliers to conduct the exchange of electronic transactions with Medicare FFS.

**Billing Service** – a third party that prepares and/or submits claims for a provider/supplier.

**Clearinghouse** – a third party that submits and/or exchanges electronic transactions (claims, claim status or eligibility inquiries, remittance advice, etc.) on behalf of a provider/supplier.

**Network Service Vendor** – a third party that provides connectivity between a provider, supplier, clearinghouse or billing service and First Coast.

Medicare requires all trading partners to complete EDI registration and sign an EDI enrollment form. The EDI enrollment form designates the Medicare contractor and/or CEDI as the entity they agree to engage in for EDI and ensures agreement between parties to implement standard policies and practices to ensure the security and integrity of information.
exchanged. The forms can be accessed at: http://medicare.fcso.com/EDI_Forms/

Entities processing paper do not need to complete an EDI registration.

Once the form(s) have been downloaded and completed, they can be faxed, emailed or mailed to First Coast Medicare EDI. (See section 5 for contact information).

When your forms have been processed you will be notified that your enrollment has been completed or returned as unprocessable.

Under HIPAA, EDI applies to all covered entities transmitting the following administrative transactions: 837I and 837P, 835, 270/271, 276/277 and NCPDP. Beginning on January 1, 2011, Medicare contractors and CEDI will also use the TA1, 999 and 277CA error handling transactions.

Medicare requires that First Coast furnish new providers/suppliers that request Medicare claim privileges information on EDI. Additionally, Medicare requires First Coast to assess the capability of entities to submit data electronically, establish their qualifications (see test requirements in Section 3.0 below), and enroll and assign submitter EDI identification numbers to those approved to use EDI. The EDI enrollment process for the Medicare beneficiary inquiry system (HETS 270/271) is currently a separate process. Information on how to get connected for HETS 270-271 can be found at https://www.cms.gov/Research-Statistics-Data-and-Systems/CMS-Information-Technology/HETSHelp/HowtoGetConnectedHETS270271.html.

A provider must obtain an NPI and furnish that NPI to First Coast prior to completion of an initial EDI Enrollment Agreement and issuance of an initial EDI number and password by that contractor. First Coast is required to verify that NPI is on the Medicare claim processing systems. If the NPI cannot be verified on the Medicare claim processing systems, the EDI Enrollment Agreement is denied and the provider is encouraged to contact First Coast provider enrollment department (for Medicare Part A and Part B providers) or the National
Supplier Clearinghouse (for DME suppliers) to resolve the issue. Once the NPI is properly verified, the provider can reapply the EDI Enrollment Agreement.

A provider’s EDI number and password serve as a provider’s electronic signature and the provider would be liable if any entity with which the provider improperly shared the ID and password performed an illegal action while using that ID and password. A provider’s EDI access number and password are not part of the capital property of the provider’s operation, and may not be given to a new owner of the provider’s operation. A new owner must obtain their own EDI access number and password.

If providers elect to submit/receive transactions electronically using a third party such as a billing agent, a clearinghouse or network services vendor, they are required to have an agreement signed by that third party. The third party must agree to meet the same Medicare security and privacy requirements that apply to the provider in regard to viewing or use of Medicare beneficiary data. These agreements are not to be submitted to Medicare, but are to be retained by the providers. Providers will notify First Coast which third party agents they will be using on their EDI Enrollment form.

Third parties are required to register with First Coast by completing the third party agreement form. This will insure that their connectivity is completed properly; however, a separate enrollment may be required for enrollment in mailing lists to receive all publications and email notifications.

This agreement can be downloaded from the EDI forms page at https://medicare.fcso.com/EDI_Forms/. Providers must also be informed that they are not permitted to share their personal EDI access number and password with any billing agent, clearinghouse/network service vendor. Providers must also not share their personal EDI access number with anyone on their own staff who does not need to see the data for completion of a valid electronic claim, to process a remittance advice for a claim, to verify beneficiary eligibility, or to determine the status of a claim. No other non-staff individuals or entities...
may be permitted to use a provider’s EDI number and password to access Medicare systems. Clearinghouse and other third party representatives must obtain and use their own unique EDI access number and password from First Coast. For a complete reference to security requirements see section 4.4 below and refer to the Appendix A CMSR High Impact Level Data document located on the CMS website https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Internet-Only-Manuals-IOMs-Items/CMS1248023.html?DLPage=3&DLEntries=10&DLSort=0&DLSortDir=ascending.

2.3 Trading Partner Testing and Certification Process
To begin the testing and certification process, trading partners should contact Medicare EDI at 1-888-670-0940 option 1 for available test dates and times. Tests submitted without a scheduled appointment will not be evaluated. If you are unable to submit on the day of your appointment, you must reschedule.

Test claims can be new or previously submitted paid claims. Your test is submitted into a separate testing environment and is not processed for payment. If you receive a rejection on your acknowledgement, it is recommended to submit multiple transmissions (the day of your appointment) until you receive a positive acknowledgement. If you are unable to correct your file and resubmit on the day of your appointment, you must reschedule.

The EDI testing area will evaluate the final submission of the day and contact the submitter via phone call or email with the results.
3. Testing and Certification Requirements

3.1 Testing Requirements

All claim submitters must produce accurate electronic test claims before being allowed to submit claim transactions in production. All submitters must send a test file containing at least 25 claims, which are representative of their practice or services. The number of claims could be increased or decreased, on a case by case basis, to ensure adequate testing of any given submitter. Test claims are subject to standard syntax and IG semantic data edits; documentation will be provided when this process detects errors.

- Standard syntax testing validates the programming of the incoming file and includes file layout, record sequencing, balancing, alphanumeric/numeric/date file conventions, field values, and relational edits. Test files must pass 100 percent of the standard syntax edits before production is approved.

- IG Semantic Data testing validates data required for claims processing, e.g., procedure/diagnosis codes, modifiers. A submitter must demonstrate, at a minimum, a 95 percent accuracy rate in data testing before production is approved where, in the judgment of First Coast, the vendor/submitter will make the necessary correction(s) prior to submitting a production file. For FIs, the minimum 95 percent accuracy rate includes the front-end edits applied using the FISS implementation guide editing module.

- Test results will be provided to the submitter within three (3) business days; during HIPAA version transitions this time period may be extended, not to exceed ten (10) business days.

Many claim submitters use the same software, or the same clearinghouse, to submit their electronic claims to Medicare. Once a vendor or clearinghouse passes the testing process, clients of that entity using the approved software will not be required to test prior to being migrated to production. If a vendor or clearinghouse supports multiple software products, each product will require testing. Third party agents who have passed testing will be required to provide First Coast with their client migration schedule.

Providers/suppliers who submit transactions directly to more than one FI, Carrier, RHHI, A/B MAC, and/or CEDI, and billing services and
clearinghouses that submit transactions to more than one FI, Carrier, RHHI, A/B MAC, and/or CEDI, must contact each FI, Carrier, RHHI, A/B MAC, and/or CEDI with whom they exchange EDI transactions to inquire about the need for supplemental testing whenever they plan to begin to use an additional EDI transaction, different or significantly modified software for submission of a previously used EDI transaction, or before a billing agent or clearinghouse begins to submit transactions on behalf of an additional provider. The individual FI, Carrier, RHHI, A/B MAC, and/or CEDI may need to retest at that time to re-establish compatibility and accuracy, particularly if there will also be a change in the telecommunication connection to be used.

Billing services and clearinghouses are not permitted to begin to submit or receive EDI transactions on behalf of a provider prior to submission of written authorization by the provider that the billing agent or clearinghouse has been authorized to handle those transactions on the provider’s behalf. See section 2.2 above for further information on EDI Enrollment.

3.2 Certification Requirements
Medicare FFS does not certify providers/suppliers; however, First Coast does certify vendors, clearinghouses, and billing services in the form of testing with them and maintaining an approved vendor list that can be accessed at: http://medicare.fcso.com/Getting_started/

4. Connectivity / Communications
4.1 Process flows
The Electronic Data Interchange (EDI) Gateway is the system for managing data and communications between its electronic trading partners and the various First Coast lines of business (Medicare A & Medicare B). The EDI Gateway is the only means of exchanging electronic transactions with First Coast. The EDI Gateway receives and delivers transaction data (claims, claim status, remittances, etc.) between First Coast and its trading partners. The system is available 24 hours a day, 7 days a week. The diagrams below provide a high level transaction flow for both internet and non-internet EDI transactions.
4.2 Transmission Administrative Procedures

4.2.1 Re-transmission procedures
Submitters can retransmit rejected files at their discretion. To avoid a file duplication reject we suggest any one of the following:
• Re-batch your file to change the control number in the ISA segment
• Add or remove a claim
• Correct the cause of the rejection

Any file resubmitted within 30 days will reject as a duplicate file if the two files are an exact byte for byte match.

4.3 Communication Protocols
First Coast Service Options, Inc. supports the following types of Communication Protocols

1. Non-Internet
   a. File Transfer Protocol (FTP)

2. Internet
   a. Hypertext Transfer Protocol (HTTPS)
   b. Simple Object Access Protocol (SOAP)

Effective April 1, 2017, Medicare EDI Trading Partners will be able to receive and post the batch 276/277 and 835 transactions by using the public internet for the Hypertext Transfer Protocol within a connection encrypted by Transport Layer Security (HTTP/S) transport, or a Simple Object Access Protocol using X.509 Client Certificates over Secure Socket Layer for 276/277 batches and 835 transactions. In order to use this protocol trading partners must use the services of a Network Service Vendor (NSV).

Effective March 2, 2015, all Medicare EDI Trading Partners submissions and retrievals are required to use a NSV for connectivity to the EDI Gateway. The elimination of the dial-up connection for Medicare transactions such as claims, remittances, and claim status inquiries, was implemented in support of the Centers for Medicare & Medicaid Services (CMS) security guidelines for Medicare contractors and due to the decreased availability of analog service. For a list of NSV and their contact information visit http://medicare.fcso.com/EDI_news/276187.asp.

The EDI Gateway is **file** oriented. All commands and health care transactions that the trading partner sends or receives are in a file and are broken down into the following simple phases of file transfer: **LOGON, SUBMIT, OBTAIN**, and **LOGOFF**.
A typical session uses Xmodem file transfer protocol to transfer commands and data between the trading partner and EDI Gateway and consists of the following steps:

° Trading Partner **modem dials and connects** with Gateway modem
° Gateway Sends Session Start Text (“+++”)
° Trading Partner Sends **LOGON** command file
° Trading Partner Sends **SUBMIT** command file
° Trading Partner Sends **data** file
° Trading Partner Sends **OBTAIN** command file
° Trading Partner Receives **data** file
° Trading Partner Sends **LOGOFF** command file
° Trading Partner Receives **Session Messages** file
° Mutual **Disconnect**

Below is a list of CMS approved AT&T Global Network services Resellers.

</tr>
</tbody>
</table>

### 4.4 Security Protocols
Trading Partners who conduct business with Medicare are subject to CMS security policies.

A/B MACs, DME MACs, CEDI, and other entities contracting directly with CMS are considered service providers to CMS. As such, these entities are part of CMS’ system security boundary and must be in compliance with the Federal Information Security Management Act (FISMA) and are subject to CMS security policies. Covered entities,
trading partners and business associates not contracting as service providers to CMS are outside of the CMS system security boundary and are not considered as FISMA entities. These entities must comply with the mandates of the HIPAA Privacy and Security Rules as well as the mandates defined in ARRA/ Health Information Technology for Economic and Clinical Health (HITECH).

CMS' information security policy strictly prohibits the sharing or loaning of Medicare assigned IDs and passwords. Users should take appropriate measures to prevent unauthorized disclosure or modification of assigned IDs and passwords. Violation of this policy will result in revocation of all methods of system access, including but not limited to EDI front-end access or EDC RACF user access. First Coast is responsible for notifying all affected providers/suppliers as well as reporting the system revocation to CMS. See the Appendix A CMSR High Impact Level Data document (Section IA-2) located on the CMS website at https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Internet-Only-Manuals-IOMs-Items/CMS1248023.html?DLPage=3&DLEntries=10&DLSort=0&DLSortDir=ascending.

Providers who wish to use the EDI Gateway must first complete and submit an EDI enrollment form. Upon successful enrollment, First Coast will assign a unique mailbox ID and an initial password to the provider. This information will be either faxed, emailed or mailed, via postal service, to the address on file. The mailbox ID and password are used in your logon command in your billing software and must remain current to avoid transmission disruptions.

Mailbox ID criteria
- Mailbox IDs are case sensitive.
- The mailbox ID is exactly 9 characters long and may contain upper or lower case letters [A-Z, a-z] or numbers [0-9].
- The mailbox ID does not expire and must be entered exactly as given.

Password criteria
- The password expires every 60 days.
  1. To inquire on the password expiration date:
     http://medicare.fcso.com/Gateway/check.asp
2. To reset your password:
   http://medicare.fcso.com/Gateway/
   - Passwords must be exactly 8 characters long and may contain
     a combination of letters and numbers, but the letters must be
     upper case.
   - Passwords may not be repeated within 10 updates and must
     differ from previous passwords by at least 4 characters.
   - Passwords may not be the same as your mailbox ID.
   - You cannot use the word “PASSWORD.”

5. Contact information
5.1 EDI Customer Service
   - **Address:**
     First Coast Service Options Inc.
     P.O. Box 44071
     Jacksonville, FL 32231-4071
   - **Telephone Number:**
     EDI General Support
     1-888-670-0940 option 1
     PC-ACE
     1-888-670-0940 option 2
     DDE
     1-888-670-0940 option 3
     Enrollment
     1-888-670-0940 option 4
   - **Fax:** 904-361-0470
   - **Email Address:**
     The EDI Help Desk can also be contacted via email at
     mailto:MedicareEDI@fcso.com. A 24-hour turnaround should
     be maintained when communicating via email.
   - **Hours of Operation:**
     The Medicare EDI phone lines are available Monday -
     Thursday 8:00 - 12:30 and 1:30 to 4:30 and Friday’s from
     12:30 to 4:30 eastern standard time. A list of First Coast
     Observed Holidays can be found at:
     http://medicare.fcso.com/Contacts/223825.asp

5.2 Provider Services
The First Coast Provider Contact Center (PCC) customer service
representatives are available to assist you with a wide-range of
Medicare coverage and billing-related inquiries. Please review the
following information on the types of inquiries the PCC is available to
assist you with.
Provider Contact Center
Part A: FL, USVI -- 1-888-664-4112; PR -- 1-877-908-8433
Part B: FL, USVI -- 1-866-454-9007; PR -- 1-877-715-1921

Representatives are available to:
- Assist with general Medicare information/billing questions;
- Clarify why a claim processed the way it did;
- Provide guidance on how to use the interactive voice response (IVR) system and the Medicare.fcso.com Web site; and
- Assist with other complex issues that cannot be addressed through the IVR system.

Representatives are not able to:
- Provide claim status, beneficiary eligibility, or any other information that is available through the IVR system;
- Provide information on what modifiers, diagnosis codes, current procedural terminology (CPT) codes or Healthcare Common Procedure Coding System (HCPCS) to use for specific claims or beneficiaries;
- Preauthorize any type of service or supply; and
- Answer inquiries from beneficiaries or their representatives.

Interactive Voice Response
Dedicated telephone numbers are:
- Part A (877-602-8816)
- Part B (877-847-4992)
Specific claims, enrollment, and eligibility information is available during the following designated business hours:

**Part A**: 7:00 AM-7:00 PM Monday-Friday and 7:00 AM-3:00 PM Saturday
**Part B**: 7:00 AM-6:30 PM Monday-Friday and 7:00 AM-3:00 PM Saturday

General and hot topics information is available 24-hours a day

5.3 Applicable Websites / email
See section 2.1 Working Together above for applicable website/email information.
# 6. Control Segments / Envelopes

</tbody>
</table>
Interchange Control (ISA/IEA), Function Group (GS/GE), and Transaction (ST/SE) envelopes must be used as described in the national implementation guides. Medicare’s expectations for inbound ISAs and a description of data on outbound ISAs are detailed in this chapter. Specific guidelines and instructions for GS and GE segments are contained in each Transaction Information companion Guide.

Note: Medicare only accepts functional groups based upon one TR3 Implementation Guide per Interchange Envelope (ISA/IEA). If transactions based upon more than one TR3 Implementation Guide are being submitted, each must be contained within its own Interchange

For Medicare FFS specific guidance refer to the appropriate Medicare FFS transaction specific edit documents found at http://www.cms.gov/ElectronicBillingEDITrans/.

### 6.1 ISA-IEA

#### Delimiters – Inbound Transactions

As detailed in the HIPAA adopted implementation guides, delimiters are determined by the characters sent in specified, set positions of the ISA header. For transmissions to Medicare (inbound transmissions), these characters are determined by the submitter and can be any characters which are not contained within any data elements within the ISA/IEA Interchange Envelope.

#### Delimiters – Outbound Transactions

Medicare recommends the use of the following delimiters in all outbound transactions; trading partners/submitters should contact their local FI, RHHI, Carrier, A/B MAC or CEDI for any deviations. Note that these characters will not be used in data elements within an ISA/IEA Interchange Envelope.

<table>
<thead>
<tr>
<th>Delimiter</th>
<th>Character Used</th>
<th>Dec Value</th>
<th>Hex Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Data Element Separator</td>
<td>^</td>
<td>42</td>
<td>2A</td>
</tr>
<tr>
<td>Repetition Separator</td>
<td>~</td>
<td>94</td>
<td>5E</td>
</tr>
<tr>
<td>Component Element Separator</td>
<td>:</td>
<td>58</td>
<td>3A</td>
</tr>
<tr>
<td>Segment Terminator</td>
<td>~</td>
<td>126</td>
<td>7E</td>
</tr>
</tbody>
</table>
**Inbound Data Element Detail and Explanation**

All data elements within the interchange envelop (ISA/IEA) must follow X12 syntax rules as defined within the adopted implementation guide.

**6.2 GS-GE**

Functional group (GS-GE) codes are transaction specific. Therefore, information concerning the GS/GE Functional Group Envelope can be found in the transaction specific appendices of this companion guide.

**6.3 ST-SE**

Medicare has no requirements outside the HIPAA adopted transaction implementation guides.

**7. Acknowledgements and Reports**

When submitting ANSI transactions, a TA1 (Interchange Acknowledgment), ANSI 999 (Implementation Acknowledgment), or 277CA (Claims Acknowledgement) is created for each submitted ANSI file.

1. **TA1 - Interchange Acknowledgment - File Rejected**

   ```plaintext
   ISA*00*00*ZZ*592015694*ZZ*999999999*980903*1215**00501*100469823*0*P*> TA1*000000003*991228*1650*R*024 IEA*0*100469823
   ```

   Note: ISA-14 must contain a "1" in order to receive a TA1 rejection. If the ISA-14 is populated with a "0" a TA1 will not be returned.

2. **999 - Implementation Acknowledgment - File Accepted**

   ```plaintext
   ISA*00*00*ZZ*592015694*ZZ*999999999*110126*1316***00501*00000001*0*P*:~ GS*FA*09101*A999920110126*131612*1*X*005010X231A1~ ST*999*0001*005010X231A1~ AK1*HC*17001*005010X223A1~ AK2*837*00000001*005010X223A1~ IK5*A~ AK9*A*1*1*1~ SE*6*001~ GE*1*1~ IEA*1*00000001~

7.1 ASC X12 Acknowledgments

Medicare has adopted two new acknowledgement transactions, the 999 Implementation Acknowledgment For Health Care Insurance and
the 277 Claims Acknowledgement or 277CA. These two acknowledgments will replace proprietary reports previously provided by First Coast.

Medicare FFS has adopted a process to only reject claim submissions that are out of compliance with the ASC X12 version 5010 standard; the appropriate response for such errors will be returned on a 999 Implementation Acknowledgment transaction. Batch submissions with errors will not be rejected in totality, unless warranted, but will selectively reject the claims submitted in error within it. Thus, Medicare FFS will reject claim submissions and return a 999 Implementation Acknowledgment transaction with the error responses listed within the 837 Institutional or Professional Edits Spreadsheet found at http://www.cms.gov/ElectronicBillingEDITrans/.

7.2 Report Inventory
First Coast only returns ANSI-X12 Acknowledgements as listed below:

<table>
<thead>
<tr>
<th>Report name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TA1</td>
<td>Interchange Acknowledgment</td>
</tr>
<tr>
<td>999</td>
<td>999A - Implementation Acknowledgment - Accepted</td>
</tr>
<tr>
<td></td>
<td>999E - Implementation Acknowledgment - Accepted with Errors</td>
</tr>
<tr>
<td></td>
<td>999R - Implementation Acknowledgment - Rejected</td>
</tr>
<tr>
<td>277CA</td>
<td>Claim Acknowledgment</td>
</tr>
</tbody>
</table>

Note: The 277 CA replaces the Part B EDI Batch Detail Control Listing Report, and the Part A Accept/Reject report.

8. Additional Trading Partner Information
First Coast has provided the following requirements that will assist you in a successful file transmission.

- All files submitted to First Coast must be submitted in uppercase.
- First Coast will edit data submitted within the envelope segments (ISA, GS, and ST). Requirements are listed in this document under "Control Segments."
- Once you are given the approval to begin submitting production, the indicator in ISA-15 should be changed to “P.”
- New with 5010: ISA06, GS02, and NM109 (837 1000A Loop or the 276 2100B Loop) must contain the same sender number.
First Coast will reject an interchange (transmission) that is submitted with a submitter identification number that is not authorized for the transaction being submitted.

First Coast suggests retrieval of the ANSI 999 functional acknowledgment no later than five days after the file submission.

First Coast will reject an interchange (transmission) that is not submitted with unique values in the ST02 (Transaction set control number) elements within the same GS to GE envelope.

Only valid qualifiers for Medicare must be submitted on incoming transactions. Any qualifiers submitted for Medicare processing that are not defined for use will be errored back to the submitter.

All PWK data relevant to the claim being submitted must accompany a completed cover sheet. The PWK documentation and coversheet may not be submitted prior to submission of the claim.

8.1 Implementation Checklist
1. **Complete the proper forms**: Once you decide to submit claims electronically, you will need to complete the following form
   - **Electronic Data Interchange (EDI) enrollment form**: This form is an agreement mandated by the Centers for Medicare & Medicaid Services (CMS) to be completed by each provider. Detailed completion instructions are available on the medicare.fcso.com website and can be faxed or mailed.

2. **Schedule Testing appointment**: Once you have been assigned an EMC sender/submitter number you will be required to submit a batch of test claims (from your office to our office not the vendor location), for evaluation.
   
   To begin the testing and certification process, trading partners must contact Medicare EDI at 1-888-670-0940 option 1 for available test dates and times. Tests submitted without a scheduled appointment will not be evaluated. If you are unable to submit on the day of your appointment, you must reschedule.

3. **Submit test claims**: The Medicare EDI testing area will evaluate the test and contact you with the results. The test must meet accuracy requirements to be approved to submit production electronic claims for processing.
Test claims can be new or previously submitted paid claims. Your test is submitted into a separate testing environment and is not processed for payment. If you receive a rejection on your acknowledgement, it is recommended to submit multiple transmissions (the day of your appointment) until you receive a positive acknowledgement. If you are unable to correct your file and resubmit on the day of your appointment, you must reschedule.

You should receive the test results within three working days from the date the test data is received by First Coast EDI.

4. **Submit production claims:** Upon approval to submit production claims (passed the test), providers should begin submitting claims electronically in the production environment, as soon as possible (normally within 30 days). We request that you transmit at least one production batch per month to keep your sender number and password active.

5. **Take advantage of other electronic applications available to providers billing electronic claims:** You can take advantage of other electronic applications that will assist you in maximizing your efficiency. These applications are listed in the order of provider needs.

   - Electronic remittance notice (ERN)
   - Electronic claim status (ECS)

All of the electronic applications are similar to electronic claims submission in the fact that you will need to obtain the software application from your software support vendor. Medicare only makes the applications available for use and does not provide the actual software application.

8.2 **Trading Partner Agreement**

EDI Trading Partner Agreements ensure the integrity of the electronic transaction process. The Trading Partner Agreement is relate to the electronic exchange of information, whether the agreement is an entity of a part of a larger agreement, between each party to the agreement. Medicare FFS requires all Trading Partners to sign a Trading Partner Agreement with First Coast. This agreement can be found at [http://medicare.fcso.com/EDI_Forms/](http://medicare.fcso.com/EDI_Forms/)

Additionally, First Coast required the following: here are no additional requirements for the Trading Partner Agreement. All procedures are outlined in the EDI enrollment and registration process section 2.2 Trading Partner Registration.
