

# Medicare A Bulletin

A Newsletter for Florida Medicare Part A Providers

## 2001 ICD-9-CM Coding Update

Information in this special issue of the *Medicare A Bulletin* is a reproduction of the fiscal year (FY) 2001 official authorized addenda to the ICD-9-CM coding structure provided by the Health Care Financing Administration.

**The 2001 update to the ICD-9-CM diagnosis coding structure is effective October 1, 2000.** Providers are required to use the 2001 updated ICD-9-CM coding effective for all hospital discharges and outpatient services occurring **on or after October 1, 2000**. Due to the direct relationship between coding and reimbursement, it is particularly important that providers reimbursed under the prospective payment system (PPS) used the appropriate ICD-9-CM coding. Other providers that code diagnoses and procedures (non-OPPS providers) are also affected. In addition, the new diagnosis coding is used in hospital outpatient billing.

Information regarding the 2001 ICD-9-CM coding update is also available on the HCFA website – [www.hcfa.gov](http://www.hcfa.gov). Changes to local medical review policies affected by the 2001 ICD-9-CM update will be published in future issues of the *Medicare A Bulletin*.

In addition, a new PPS Grouper (version 18.0) will assign diagnosis related groups (DRGs) based on the new codes. The Medicare code editor (MCE version 17.00), and the outpatient code editor (OCE version 1.1) will use the new codes in validating for discharges and outpatient services occurring **on or after October 1, 2000**.

The latest versions of the ICD-9-CM manuals (as well as a variety of other coding materials) may be obtained from:
