

2004 ICD-9-CM Coding Update

The *International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM)* is the official system for assigning codes to diagnoses and procedures associated with hospital utilization in the United States.

The National Center for Health Statistics (NCHS) and the Centers for Medicare & Medicaid Services (CMS) are the governmental agencies responsible for overseeing all changes and modifications to the ICD-9-CM.

The 2004 update to the *ICD-9-CM* diagnosis coding structure is effective **October 1, 2003**. Providers are required to use the 2004-updated ICD-9-CM coding effective for all hospital discharges and outpatient services occurring **on or after October 1, 2003**. Due to the direct relationship between coding and reimbursement, it is important that providers reimbursed under the prospective payment system (PPS) use the appropriate ICD-9-CM coding. Other providers that code diagnoses and procedures (non-OPPS providers) are also affected. In addition, the new diagnosis coding is used in hospital outpatient billing.

This issue contains the following sections:

- ICD-9-CM Tabular Addenda – Diagnosis Tables 6A – 6F
- FY 2004 Final Addenda ICD-9-CM Volume 3, Procedures – Tabular List
- Tabular Addenda – October 1, 2003 (FY04)
- ICD-9-CM Index to Diseases (fiscal year 2004).

A new PPS GROUPER will assign diagnosis related groups (DRGs) based on the new codes. The Medicare code editor, and the outpatient code editor systems will use the new codes in validating for discharges and outpatient services occurring **on or after October 1, 2003**.

The ICD-9-CM Addendum containing the new, revised, and deleted ICD-9-CM codes may also be accessed on the CMS Web site at www.cms.hhs.gov/medlearn/icd9code.asp and on the NCHS Web site at www.cdc.gov/nchs/icd9.htm. ❖
