# 2003 HCPCS ANNUAL UPDATE

## Annual Procedure Code Update

Effective for Services Furnished on or After January 1, 2003

The Centers for Medicare & Medicaid Services (CMS) uses the Healthcare Common Procedure Coding System (HCPCS) to administer the Medicare program. The HCPCS is a collection of codes and descriptors for reporting medical procedures, supplies, products and services that may be provided to Medicare beneficiaries. The HCPCS annual update is designed to promote uniform reporting and statistical data collection of medical procedures, supplies and services.

The HCPCS is updated annually to reflect changes in the practice of medicine and provisions of the health care industry. The HCPCS annual update also contains modifiers, which are two-position codes and descriptors used to indicate a furnished or performed service that has been altered by some specific circumstance but not changed in its definition or code.

This special issue provides an overview of changes to the HCPCS coding structure for 2003. This publication only covers specific coding changes. Related billing and reimbursement changes if applicable will be provided on the provider education Web site at [www.floridamedicare.com](http://www.floridamedicare.com) and in future issues of the *Medicare A Bulletin*. This information is also shared with the Florida Medical Association, all county medical societies and all active specialty associations. Stay in contact with these organizations and read their bulletins for additional HCPCS information.

When filing claims to Medicare Part A of Florida for dates of service beginning January 1, 2003, refer to the coding changes in this publication.

### Description of HCPCS Coding Levels

Code additions, deletions and revisions may be made annually to the three levels of the HCPCS coding structure and to Category III temporary codes established for reporting new emerging technologies. These coding levels structures are:

#### Level I – Numeric Codes (CPT)

Level I codes include five-digit numeric codes. These codes describe various physician and laboratory procedures and are contained in the American Medical Association (AMA) *Current Procedural Terminology* Fourth Edition (CPT®). It also includes two-digit alpha and or numeric modifiers.

#### Level II – Alpha Numeric (HCFA-Assigned)

Level II codes and modifiers include alphanumeric codes assigned by CMS. These codes describe various non-physician and a relatively few number of physician services. These procedure codes begin with an alpha character in the A-V range and are used for durable medical equipment (DME), ambulance services, prosthetics, orthotics, ostomy supplies, etc.

#### Level III – Alpha Numeric (Locally-Assigned)

Level III codes and modifiers include alphanumeric codes assigned locally by Medicare of Florida. Level III codes describe procedures not included in Level I or Level II and begin with an alpha prefix of W-Z. Many level III, or locally assigned, codes are being discontinued as part of the standardization of the Medicare program.

#### Category III Codes – New Emerging Technology Codes

During 2001, the AMA CPT Editorial Panel established a new category of CPT codes called Category III codes. These codes are a set of temporary codes intended for tracking emerging technologies. Review of emerging technology codes is made by the CPT Editorial Panel as part of its procedures to annually update CPT codes. The CPT Editorial Panel will determine if a temporary emerging technology code should be converted to a permanent existing technology Category I CPT code or if a new emerging technology code should be established. The syntax of emerging technology codes is four digits followed by the letter "T". ❖

## The 2003 HCPCS Update

The 2003 HCPCS update is divided into the following major sections:

### Additions

The procedure/modifier codes listed under "Modifiers and Procedure Codes Added for 2003" section (pages 5-6) are newly identified CPT/HCPCS codes and modifiers that must be used only for services furnished **on or after January 1, 2003**.

### Revisions

The procedure/modifier codes listed under "Modifiers and Procedure Codes Revised for 2003" section (pages 7-8) include CPT/HCPCS codes in which the descriptor or

administrative instructions have changed from 2002. When using these codes, refer to the 2003 CPT or HCPCS coding books to ensure the correct code is billed for the service furnished.

### Discontinued Procedures

The procedure codes listed under "Modifiers and Procedure Codes Discontinued for 2002" section (pages 9-10) should not be used for service dates **after December 31, 2002**. However, Medicare contractors will continue to accept claims with discontinued CPT/HCPCS codes with 2003 service dates received prior to April 1, 2003. Services provided in 2003 that are billed with discontinued CPT/

*The 2003 HCPCS Update (continued)*

HCPCS codes, will be allowed at 2002 payment rates when received between January 1, 2003, and March 31, 2003.

Effective for claims received **on or after April 1, 2003**, services furnished in 2003 billed to Medicare Part A using discontinued codes will be denied payment. Providers will be notified that a discontinued *CPT/HCPCS* code was submitted and a valid *CPT/HCPCS* code must be used.

When billing for services listed in the discontinued code section, the code(s) indicated in the "Codes to Report" column must be used. If more than one replacement code or no replacement code exists, refer to the appropriate coding book for additional guidelines.

**A Word About Coverage**

*CPT/HCPCS* codes that are noncovered by Medicare due to statute are not represented on these lists. However, inclusion of a code on the lists does not necessarily constitute Medicare coverage. For example, a code may be noncovered on the basis of local medical review policy (LMRP). Diagnostic tests that are noncovered due to a LMRP are noncovered whether purchased or personally furnished.

**Jurisdiction**

The lists of added, revised, or discontinued *CPT/HCPCS* codes for 2003 are complete with no regard to contractor jurisdiction. The majority of procedure codes in the HCPCS are processed in Florida by the local Medicare Part A fiscal intermediary, First Coast Service Options, Inc. (FCSO). However, some *CPT/HCPCS* codes listed represent services processed by the durable medical equipment regional carrier (DMERC). The DMERC that serves Florida is Palmetto Government Benefits Administrators ([www.palmettogba.com](http://www.palmettogba.com)). It is the responsibility of the billing provider to submit claims to the appropriate Medicare contractor.

**Use of Unlisted *CPT/HCPCS* Codes**

If a *CPT/HCPCS* code cannot be found that closely relates to the actual service furnished, an "unlisted or not otherwise classified" *CPT/HCPCS* code may be submitted with a complete narrative description of the service provided in the "Remarks" field of Form UB-92 CMS-1450 or its electronic equivalent.

*Third-party Web sites.* This document contains references to sites operated by third parties. Such references are provided for your convenience only. BCBSF and/or FCSO do not control such sites and are not responsible for their content. The inclusion of these references within this document does not suggest any endorsement of the material on such sites or any association with their operators.

**Grace Period Established for 2003 HCPCS Update**

The 2003 Healthcare Common Procedure Coding System (HCPCS) update is effective for services provided **on or after January 1, 2003**. The Centers for Medicare & Medicaid Services extends a 90-day grace period when either 2002 or 2003 *CPT/HCPCS* codes and modifiers are accepted by Medicare contractors. This grace period applies to claims received prior to April 1, 2003, and includes the codes discontinued for dates of service January 1, 2003 or later.

Effective January 1, 2003 through March 31, 2003, providers may use 2002 and/or 2003 *CPT/HCPCS* codes and modifiers. **Effective April 1, 2003, Medicare will only accept the 2003 *CPT* and *HCPCS* codes and modifiers.** Since codes and modifiers discontinued for 2003 include an updated payment rate if billed during the grace period, inequities between the old and new *CPT/HCPCS* codes do not exist. Consequently, adjustments to change a discontinued or invalid code to a new code (or vice versa) for additional payment will not be honored. ❖

Source: CMS Transmittal AB-02-132, CR 2358

Every effort should be made to locate a specific replacement code, since the use of unlisted procedure codes may result in delays in claim processing.

**Reminder for EMC Billers**

Unlisted or not otherwise classified *CPT/HCPCS* codes may be submitted with a brief descriptor, the required information may be indicated in the appropriate narrative record. Providers may need to contact their EMC (electronic media claims) vendors to determine if their system has this capability.

**Questions or Concerns?**

Providers are encouraged to refer to all available resource materials for specific *CPT/HCPCS* coding instructions and claims filing information. Medicare Part A reference materials include the *Medicare A Bulletin* and special bulletins.

However, if the information cannot be found in any of the reference materials, contact the Medicare Part A Customer Service department at (877) 602-8816.

**Obtaining the 2003 Coding Books**

Because of the many changes to the HCPCS coding structure, providers are strongly encouraged to purchase the 2003 *CPT* (Level I) book and/or the *2003 HCPCS Level II* coding book. Providers may purchase the 2003 edition of the *CPT* (Level I codes) from the American Medical Association (AMA) online at [www.ama-assn.org/catalog](http://www.ama-assn.org/catalog) by calling the toll-free number (800) 621-8335, or by writing:

American Medical Association  
P.O. Box 109050  
Chicago, IL 60610-0946

**Obtaining the 2003 HCPCS Alphanumeric Hardcopy**

The 2003 alphanumeric hardcopy, titled *Healthcare Common Procedure Coding System, HCPCS 2003* may be obtained from:

Superintendent of Documents  
U.S. Government Printing Office  
Washington D.C. 20402  
Telephone: (202) 512-1800 ❖

# 2003 OUPATIENT SERVICES FEE SCHEDULE

## 2003 Medicare Physician Fee Schedule Services

The Centers for Medicare & Medicaid Services (CMS) has issued guidelines for processing claims for dates of service **on or after January 1, 2003**, subject to the Medicare physician fee schedule (MPFS) payment methodology. Because publication of the final MPFS regulation was delayed, implementation plans for the calendar year (CY) 2003 MPFS update will be effective March 1, 2003.

### Processing Instructions

Since the new 2003 rates for services paid under the MPFS are not effective until March 1, 2003, the following processing guidelines are being implemented:

- The CY 2003 payment rates for services paid under the MPFS will be effective **March 1, 2003**.
- Claims for services furnished **on or after January 1, 2003, through February 28, 2003**, payable under the MPFS will be reimbursed based on the 2002 MPFS, with the exception of new (added) CY 2003 CPT/HCPCS codes. A list of new CY 2003 HCPCS codes affected by the MPFS is provided below.
- New 2003 HCPCS codes payable under the MPFS are not effective in the fiscal intermediary systems **until March 1, 2003**.

**Providers are encouraged not to submit claims for new CY 2003 HCPCS for services furnished on or after January 1, 2003 through February 28, 2003 payable under the MPFS methodology. Providers should continue to use the MPFS HCPCS code billed in 2002 for January and February 2003 services.** Claims submitted with new CY 2003 HCPCS codes payable on the Medicare physician fee schedule for services furnished in January and February 2003 will be returned to the provider.

- Claims for services furnished **on or after March 1 2003 through December 31, 2003**, will be paid at the CY 2003 MPFS payment rate.
- CY 2003 payment amounts for all other services **not** paid under the MPFS methodology are effective **January 1, 2003**.

### New 2003 CPT/HCPCS Codes Subject to Payment under the Medicare Physician Fee Schedule

## 2003 Clinical Laboratory Services Subject to Fee Schedule and Reasonable Charge Payment Methodologies

In accordance with section 1833(h)(2)(A)(i) of the Social Security Act (the Act), the annual update to the local clinical laboratory fees for 2003 is 1.1 percent. Section 1833(a)(1)(D) of the Act provides that payment for a clinical laboratory test is the lesser of the actual charge billed for the test, the local fee, or the national limitation amount (NLA). For a cervical or vaginal smear test (Pap smear), section 1833(h)(7) of the Act requires payment to be the lesser of the local fee or the NLA, but not less than a national minimum payment amount (described below). However, for a cervical or vaginal smear test (Pap smear), payment may also not exceed the actual charge. The Part B deductible and coinsurance do not apply for services paid under the clinical laboratory fee schedule.

### National Minimum Payment Amounts

For a cervical or vaginal smear test (Pap smear), the 2003 national minimum payment amount is \$14.76 (\$14.60 plus 1.1 percent update for 2003). The affected codes for the national minimum payment amount are:

88142 88143 88144 88145 88147 88148 88150  
88152 88153 88154 88164 88165 88166 88167  
88174 88175 G0123 G0143 G0144 G0145  
G0147 G0148 P3000.

### National Limitation Amounts (Maximum)

For tests for which NLAs were established before January 1, 2001, the NLA is 74 percent of the median of the local fees. For tests for which NLAs are first established on or after January 1, 2001, the NLA is 100 percent of the median of the local fees in accordance with section 1833(h)(4)(B)(viii) of the Act.

### Pricing Information

The 2003 laboratory fee schedule includes separately payable fees for certain specimen collection methods (codes G0001, P9612, and P9615). The fees have been established in accordance with section 1833(h)(4)(B) of the Act.

Instructions on separately payable fees for traveling to perform a specimen collection for either a nursing home or homebound patient were issued in June 1999. There are two codes: P9603 for a per mileage trip basis or code P9604 for a flat rate trip basis where the average round trip is generally less than 20 miles (or an average of 10 miles per leg of the trip). To bill either code requires documentation of the number of specimens performed per trip (for both Medicare and non-Medicare patients) to compute the Medicare prorated fee. Code P9604 requires the laboratory to determine the appropriateness of billing on an average round trip basis for all trips during a one-year time period. Thus, payment for travel under code P9604 is made to reasonably pay on average for a varying range of trip miles so that the laboratory should not also require payment with another basis. The payment for codes P9603 and P9604 reflects personnel and transportation costs. For dates of service January 1, 2003 through December 31, 2003, the personnel payment is \$.45 per mile updated in accordance with section 1833(h)(4)(B) of the Act. For dates of service January 1, 2003 through December 31, 2003, the standard mileage rate for transportation costs is \$0.36 (decreased from year 2002). More explanation of the

development of the 2003 standard mileage rate will be available by late December at the Web site [www.gsa.gov](http://www.gsa.gov), search for privately owned vehicle reimbursement rates.

The 2003 laboratory fee schedule also includes codes that have a 'QW' modifier to both identify codes and determine payment for tests performed by a laboratory registered with only a certificate of waiver under the Clinical Laboratory Improvement Amendments of 1988 (CLIA).

For 2003, the CPT Editorial Panel revised specimen collection code 36415 to represent *Collection of venous blood by venipuncture* and added code 36416 *Collection of capillary blood specimen (e.g., finger, heel, ear stick)*. However, the Centers for Medicare & Medicaid Services (CMS) must undertake further efforts before implementing codes 36415 and 36416. For 2003, the clinical laboratory fee schedule will continue to include code G0001 *Routine venipuncture for collection of specimen(s)* and laboratories should continue to bill code G0001 for Medicare payment of venous blood collection by venipuncture.

For 2003, the CPT Editorial Panel developed 12 new codes 38204 through 38215 for bone marrow or stem cell services and procedures. These codes describe numerous steps in the harvesting and transplantation of cells. However, due to concerns about beneficiary liability and implications for the Medicare physician fee schedule, new codes 38207 through 38215 will be invalid for Medicare purposes. Instead, the 2003 laboratory fee schedule will retain codes 88240 and 88241 related to the harvesting and transplantation of cells for diagnostic purposes and will include two new codes G0265 and G0266 for therapeutic purposes. Code 86915 is discontinued and replaced by code G0267 for Medicare billing. G0267 is subject to laboratory reasonable charge payment methodology.

|       |   |
|-------|---|
| G0265 | Cryopreservation, freezing and storage of cells for therapeutic use, each cell line   |
| G0266 | Thawing and expansion of frozen cells for therapeutic use, each cell line   |
| G0267 | Bone marrow or peripheral stem cell harvest, modification or treatment to eliminate cell type(s) (e.g., T-cells, metastatic, carcinoma) |

For 2003, the CPT Editorial Panel made changes in the reporting of automated complete blood count (CBC) parameters. Laboratories must review the coding changes to ensure claims accurately reflect automated CBC testing that was ordered and performed. CMS will monitor claims to detect potential misuse of these codes and may reevaluate these services in the future.

Based on comments regarding codes 87800 and 87801, the mappings were revised. Code 87800 has been mapped to two times code 87797 and code 87801 has been mapped to two times code 87798.

### Organ or Disease Oriented Panels

Similar to prior years, the 2003 pricing amounts for certain organ or disease panel codes and evocative/suppression test codes were derived by summing the lower of the fee schedule amount or the NLA for each individual test code included in the panel code. The national limitation amount field on the data file is zero-filled.

2003 Clinical Laboratory Fee Schedule and Laboratory Services Subject to Reasonable Charge ... (continued)

**Cervical or Vaginal Smear Tests (Pap smears)**

For 2003, the CPT Editorial Panel created new codes 88174 and 88175 (and deleted codes 88144 and 88145) for cervical or vaginal smear tests performed for diagnostic purposes by automated testing systems with thin layer preparation. For the same tests performed for preventive or 'screening purposes,' alphanumeric HCPCS codes G0144 and G0145 are billed. For 2003, CMS revised the descriptor of codes G0144 and G0145 to match new codes 88174 and 88175.

**Codes that Required Gap-Fill Amounts**

Carriers are required to establish an initial gap-fills amount for new laboratory tests and provide this payment information to the fiscal intermediary. The established gap-fill amounts for 2003 new laboratory codes will be published upon availability in a future issue of the *Medicare A Bulletin*.

**Laboratory Costs Subject to Reasonable Charge Payment in 2003**

The following codes relate to services subject to laboratory reasonable charge payment method.

When these services are performed for a hospital outpatient, payment is made under the hospital outpatient bundled prospective payment system. Sections MIM 3628C and

MCM 5114.1B provide reasonable charge payment instructions for other outpatient settings. When the reasonable charge payment method applies (for example, a service rendered for a nonpatient of a hospital), the inflation-indexed update is 1.1 percent for year 2003. The inflation-indexed update is calculated in accordance with section 1842(b)(3) of the Act and Section 42 CFR 405.509(b)(1).

**2003 Fee Schedules for Medicare Outpatient Services**

The Centers for Medicare & Medicaid Services (CMS), in conjunction with the Medicare Part B carrier, develops the Medicare Part A annual outpatient fee schedule. The fee schedule reimbursement amounts published in this bulletin are effective for services furnished **on or after January 1, 2003**.

**Fee Schedule Lists**

The following fee schedule reimbursement amounts are available at the time of this publication:

- Clinical Laboratory Services
- Ambulance Services (by locality)

Ambulance services are reimbursed based on the geographical locality in Florida.

Clinical laboratory services are reimbursed based on the standard fee schedule for Florida. All providers are reimbursed at the same fee scheduled allowance for these services, regardless of geographical location.

Additional 2002 outpatient services fee schedules will be published in future publications and will be posted on the provider education Web site [www.floridamedicare.com](http://www.floridamedicare.com) as soon as they become available.

**Locality Structure**

CMS reduced the number of localities in 1997. This means that Florida is now divided into three geographic localities. *Localities 01 and 02 are merged and priced at the same fee schedule rate.* For this reason, locality 01 fee schedule reimbursement information is not repeated for locality 02.

**Note:** Although the attached fee schedule listings do not reflect reimbursement in locality 02, the Direct Data Entry (DDE) system will reflect all four localities. However, localities 01 and 02 are the same fee schedule rates.

Questions regarding these fees may be addressed to Medicare Part A customer service representatives by calling 1-877-602-8816. ❖

## AMBULANCE SERVICE FEE SCHEDULE

### Ambulance Fee Schedule Updates for 2003

Section 1834(1)(3)(A) of the Act provides the basis for updating payment limits for ambulance services. Specifically, this section provides for an update in payments for 2003 that is equal to the percentage increase in the consumer price index for all urban consumers (CPI-U), for the 12-month period ending with June of the previous year. The resulting percentage is referred to as the ambulance inflation factor (AIF). The AIF for calendar year 2003 is **1.1 percent**.

During the transition period, the AIF is applied to both the fee schedule portion of the blended payment amount (incorporated in the ambulance fee schedule file) and to the reasonable cost portion of the blended payment amount separately for each ambulance provider/supplier. Then, these two amounts are added together to determine the total payment amount for each provider/supplier.

The blending percentages used to combine these two components of the payment amounts for ambulance services for the calendar year 2003 are **60 percent** of the reasonable cost and **40 percent** of the ambulance fee schedule (AFS).

The AFS rates for 2003 for Florida based on localities are provided below. Providers may calculate their payment by combining 40 percent of the appropriate fee schedule with 60 percent of their 2003 reasonable cost for the same service.

The point of pickup determines the basis for payment under the fee schedule, and the point of pickup is reported by its five-digit ZIP code. Thus, the ZIP code of the point of pickup determines both the applicable locality fee schedule amount, and whether a rural adjustment applies.

If the ambulance transport requires a second or subsequent leg, then the ZIP code of the point of pickup of the second or subsequent leg determines both the applicable fee for such leg and whether a rural adjustment applies.

Accordingly, the ZIP code of the point of pickup must be reported on every claim to determine both the correct fee schedule amount and, if applicable, any rural adjustment.

Part B coinsurance and deductible requirements apply to these services.

# GENERAL INFORMATION

## Medicare Deductible Amounts for Calendar Year 2003

Medicare beneficiaries who use covered services may be subject to deductible and coinsurance requirements. A beneficiary is responsible for an inpatient hospital deductible amount, which is deducted from the amount payable by the health insurance (HI) program to the hospital, for inpatient hospital services furnished in a spell of illness. When a beneficiary receives such services for more than 60 days during a spell of illness, he or she is responsible for a coinsurance amount equal to one-fourth of the inpatient hospital deductible, for 61-90 days spent in the hospital. After 90 days in a spell of illness, the beneficiary has 60 lifetime reserve days of coverage. The coinsurance amount for these days is equal to one-half of the inpatient hospital deductible. A beneficiary is responsible for a coinsurance amount equal to one-eighth of the inpatient hospital deductible for each 21-100 days of skilled nursing facility services furnished during a spell of illness.

### Year 2003 HI Deductible

## Standardizing Prices for Medicare Covered Drugs

On January 1, 2003, the Centers for Medicare & Medicaid Services (CMS) is implementing a single drug pricer (SDP) for drugs and biologicals (hereinafter “drugs”) with respect to drugs covered under Medicare Part B and priced by local carriers.

In the past, CMS has received much criticism concerning excessive expenditures related to the payment rates for the approximately 400 drugs that are currently paid based on 95 percent average wholesale price (AWP); i.e., physicians’ offices, outpatient hospitals, dialysis centers, etc.

Currently, this payment rate is set at 95 percent of the drugs AWP; however, these payments have sometimes varied depending upon the individual local carrier’s application of the payment methodology. Accordingly, CMS is establishing the SDP to correct identified differences amongst its local carriers and is establishing a uniform Medicare payment allowance as contemplated by

the regulation (42 C.F.R. 405.517). Drug prices will be established centrally and will be more closely monitored. As a result, providers will receive the same payment for the same drug regardless of where their claim for the drug is submitted.

CMS will continue, in accordance with its longstanding practice, to set a price for each drug based on 95 percent of AWP, and will continue to rely on published compilations (e.g., *RedBook* and *First Data Bank*) to identify wholesale drug prices. Fiscal intermediaries will be furnished with drug pricing files from CMS and will begin processing claims they receive, for each drug identified on the file, on the basis of the prices shown on these files.

CMS believes that this initiative reflects an innovative approach to resolving some of the problems relating to the pricing of Medicare-covered drugs. ❖

# OUTPATIENT HOSPITAL SERVICES

## Billing for Immunosuppressive Drugs Furnished to Transplant Patients

Effective January 1, 2003, fiscal intermediaries will no longer make payments to hospital outpatient departments subject to the outpatient prospective payment system (OPPS) for immunosuppressive drugs furnished to beneficiaries for use after discharge (e.g., 30-day supplies).

Payment may be allowed under the hospital OPPS for one administration of an immunosuppressive drug when furnished to a beneficiary who is registered as an outpatient for the purpose of receiving outpatient services. However, claims for 30-day supplies of immunosuppressive drugs furnished to beneficiaries by a hospital are not payable under the OPPS. Immunosuppressive drugs and many other drugs are packaged into services the beneficiary receives on a given day. That is, the cost billed for the drug in the base year is part of the cost of the service, such as a clinic visit, with which it was billed. Thus, there is no mechanism for paying for 30-day supplies of drugs.

### Billing Requirements

Hospitals that provide beneficiaries with immunosuppressive drugs must bill the durable medical equipment carrier (DMERC) in their area to receive payment for these supplies of immunosuppressive drugs.

Hospitals that already have a supplier number for billing the DMERC for durable medical equipment must use that number to bill the DMERC for immunosuppressive drug claims for dates of service on or after January 1, 2003.

If a hospital does **not** already have a supplier number for billing the DMERC, they must complete a Form CMS-855-S and obtain a supplier number from the National Supplier Clearinghouse (NSC). Supplier numbers are deleted if 12 months elapse without a claim submission.

### Obtaining a Supplier Number

There are two ways to obtain a supplier number from the NSC:

1. Hospitals can call the NSC directly at 1-866-238-9652, request an application form, and the NSC will send them a CMS-855-S. Once the hospital has completed the 855-S, it must be submitted as soon as possible to the NSC at the address indicated on the form.
2. Hospitals may access the CMS Web site at: [cms.hhs.gov/providers/enrollment/default.asp](http://cms.hhs.gov/providers/enrollment/default.asp), and download the 855-S in Adobe Acrobat format. They can then complete the application hard copy and submit it to the NSC at the address indicated on the form.

Hospitals must attach the following information to their applications to expedite receiving their supplier number:

- Name of current intermediary
- Medicare provider number (OSCAR number).

Once a hospital has its supplier number, it can bill the appropriate DMERC using the claim Form CMS-1500 or electronic equivalent, listing the actual drug by HCPCS code and specifying the units given to the beneficiary. The DMERC will provide specific instructions to hospital pharmacies on billing requirements. Payment from the DMERC will be based on the instructions published in the Fourth Quarter 2002 *Medicare A Bulletin* (page 9). Part B deductible and coinsurance requirements apply to these services.

The DMERC with jurisdiction for Florida claims is:  
 Palmetto GBA Medicare  
 DMERC Operations  
 P.O. Box 10041  
 Columbia, SC 29202-3141  
 (803) 735-1034 ❖

## Billing for Low Osmolar Contrast Material

Under the hospital outpatient prospective payment system (OPPS), separate payment is not made for ionic and non-ionic contrast materials. Medicare payment for ionic and non-ionic contrast media, including low osmolar contrast material (LOCM), is packaged into the ambulatory payment classification for the diagnostic procedure. Under the OPPS, there is no longer a payment difference between LOCM and other contrast materials. Therefore, the Centers for Medicare & Medicaid Services is removing the requirements imposed under sections 443.C.3f and 443.C.3g of the Medicare Hospital Manual (MHM) and sections 631.C.3f and 3631.C.3g of the Part A Medicare Intermediary Manual (MIM) for LOCM furnished on or after January 1, 2003. For hospitals that are subject to the OPPS, this notification **supersedes** instructions that differentiate payment between high osmolar contrast material and LOCM and restrict payment for LOCM to only those patients having specific diagnoses as indicated in the above sections of the MHM and MIM.

### Billing for LOCM

For LOCM furnished **on or after January 1, 2003**, hospitals subject to the OPPS must either include the charge for LOCM in the charge for the diagnostic procedure or, if billing for LOCM as a separate charge, bill using revenue code 255 – *Drugs Incident to Radiology*, or revenue code 254 – *Drugs Incident to Other Diagnostic Services*, as appropriate.

Until further notice, OPPS hospitals must not use LOCM codes A4644, A4645, or A4646 when billing for LOCM furnished **on or after January 1, 2003**. Claims submitted with LOCM codes A4644, A4645, or A4646 for services furnished on or after January 1, 2003, will be returned to the provider.

Non-OPPS hospitals must follow the billing instructions in sections 443.C.3f and 443.C.3g of the MHM and sections 3631.C.3f and 3631.C.3g of the Part A MIM. Those instructions continue to be applicable to non-OPPS hospitals. ❖

# ESRD SERVICES

## End-Stage Renal Disease Drug Pricing Update

The following revised end-stage renal disease (ESRD) drug-pricing list updates and replaces section 22 of the Medicare Part A ESRD processing manual. This list may also be used as a stand-alone reference for ESRD drugs and/or pharmacy services. Prices are effective for services rendered **on and after January 1, 2003**, and represent the Medicare maximum reimbursement for separately billable ESRD drugs and/or pharmaceuticals.

All prices, as mandated by the Centers for Medicare & Medicaid Services (CMS), are 95 percent of either:

- the lesser of the median average wholesale price of all generic forms of the drug, or
- the lowest brand name average wholesale price.

ESRD providers may order the 2002 *Drug Topics® Red Book®*. Call **(800) 222-3045**, toll-free, or write to:

Drug Topics® Red Book®  
5 Paragon Drive  
Montvale, NJ 07645-1742

- The drugs listed in this section are arranged in alphabetical order, based on the first initial of the drug name.
- When a drug is billed on Form UB-92 CMS-1450, or electronic equivalent format, an ICD-9-CM diagnosis code (excluding 585 – Chronic renal disease) must be reported.
- Diagnosis code 585 – (Chronic renal disease) must be reported as principal diagnosis code on all ESRD type of bill (TOB 72x).
- The drug prices in this revision include a five percent price reduction as mandated by CMS.

**CPT/HCPCS CODE** Current Procedural Terminology (CPT) code, Healthcare Common Procedure Coding System (HCPCS), and locally assigned code reportable on Form UB-92 CMS-1450 or electronic equivalent.

**NAME** Name of drug (brand name and/or generic).

**PRICE** Medicare Part A reimbursement allowance for specific drug administered via ESRD environment.

| CPT/HCPCS CODE | NAME  | PRICE    |
|----------------|---|----------|
| J0170          | Adrenalin, epinephrine, 1 mg/1 cc ampule      | \$ 2.26  |
| J0210*         | Aldomet, methyldopate HCL, up to 250 mg       | \$11.87  |

**Coverage of Levocarnitine for End-Stage Renal Disease Patients**

The Centers for Medicare & Medicaid Services (CMS) has implemented a national coverage determination for intravenous levocarnitine (J1955) for use in the treatment of carnitine deficiency in end-stage renal disease (ESRD) patients for services provided **on or after January 1, 2003**.

Carnitine is a naturally occurring substance that functions in the transport of long-chain fatty acids for energy production by the body. Deficiency can occur due to a congenital defect in synthesis or utilization, or from dialysis. The causes of carnitine deficiency in hemodialysis patients include dialytic loss, reduced renal synthesis and reduced dietary intake.

Intravenous levocarnitine will only be covered for those ESRD patients who have been on dialysis for a minimum of three months for one of the following indications.

Patients must have documented carnitine deficiency, defined as a plasma free carnitine level <40 micromol/L (determined by a professionally accepted method as recognized in current literature), along with signs and symptoms of:

1. Erythropoietin-resistant anemia (persistent hematocrit <30 percent with treatment) that has not responded to standard erythropoietin dosage (that which is considered clinically appropriate to treat the particular patient) with iron replacement, and for which other causes have been investigated and adequately treated, or
2. Hypotension on hemodialysis that interferes with delivery of the intended dialysis despite application of usual measures deemed appropriate (e.g., fluid management). Such episodes of hypotension must have occurred during at least 2 dialysis treatments in a 30-day period.

Continued use of levocarnitine will not be covered if improvement has not been demonstrated within six months of initiation of treatment. All other indications for levocarnitine are noncovered in the ESRD population.

For a patient currently receiving intravenous levocarnitine, Medicare will cover continued treatment if:

1. Levocarnitine has been administered to treat erythropoietin-resistant anemia (persistent hematocrit <30 percent with treatment) that has not responded to standard erythropoietin dosage (that which is considered clinically appropriate to treat the particular patient) with iron replacement, and for which other causes have been investigated and adequately treated, or hypotension on hemodialysis that interferes with delivery of the intended dialysis despite application of usual measures deemed appropriate (e.g., fluid management) and such episodes of hypotension occur during at least **two** dialysis treatments in a 30-day period; and
2. The patient's medical record documents a pre-dialysis plasma free carnitine level <40 micromol/L prior to the initiation of treatment; or
3. The treating physician certifies (documents in the medical record) that in his/her judgment, if treatment with levocarnitine is discontinued, the patient's pre-dialysis carnitine level would fall below 40 micromol/L and the patient would have recurrent erythropoietin-resistant-anemia or intradialytic hypotension.

**Billing Requirements**

The applicable types of bill are:

- 13x – Reimbursed at cost
- 72x – Reimbursed at 95 percent of AWP
- 85x – Reimbursed at cost

This drug must be billed on Form UB-92 CMS-1450 or its electronic equivalent under the revenue code 636 along with HCPCS J1955.

Deductible and coinsurance apply to this service.

A local medical review policy is being developed and will be published in a future issue of the *Medicare A Bulletin*. ❖

# SKILLED NURSING FACILITY SERVICES

## 2003 Update of HCPCS Codes Used for Skilled Nursing Facility Consolidated Billing Enforcement

The Centers for Medicare & Medicaid Services (CMS) has issued a comprehensive list of Healthcare Common Procedure Coding System (HCPCS) codes that are subject to the consolidated billing (CB) provision of the skilled nursing facility prospective payment system (SNF PPS). Services appearing on this list submitted on claims to both Medicare fiscal intermediaries (FIs) and carriers, including durable medical equipment regional carriers (DMERCs), will not be paid by Medicare to providers, other than a SNF, when **included** in SNF CB on dates when a beneficiary for whom such a service is being billed resides in a SNF. Services **excluded** from SNF PPS and CB may be paid to providers, other than SNFs, for beneficiaries in a SNF stay. In order to assure proper payment in all settings, Medicare systems must edit for services provided to SNF beneficiaries both included and excluded from SNF CB.

### SNF Consolidated Billing HCPCS Coding List

The following HCPCS codes subject to SNF CB have been classified into five major categories. **New codes listed subsequent to prior publications appear in bold in HCPCS code charts.** Codes from previous lists not appearing in this article **have been deleted.** Since there is a three-month grace period in which deleted HCPCS codes are still allowed to process, codes remain listed here if the three-month grace period overlaps with this update.

### Major Category I

#### Exclusion of Services Beyond the Scope of a SNF

The services must be provided on an outpatient basis at a hospital, including a critical access hospital (CAH), **not by a SNF**, and are excluded from SNF PPS and CB for beneficiaries in a Part A stay. Services directly related to these services, defined as services billed for the same place of service and with the same line item date of service (LIDOS) as the services listed below, are also excluded from SNF CB, with exceptions as listed below.

- Anesthesia, drugs incident to radiology and supplies (**revenues codes 037x, 0255, 027x and 062x**) will be bypassed by enforcement edits when billed with computerized tomography (CT) scans, cardiac catheterizations, magnetic resonance imaging (MRIs), radiation therapies, or angiographies or surgeries.
- In general, bypasses also allow CT scans, cardiac catheterization, MRI, radiation therapy, angiography, and outpatient surgery **HCPCS codes 0001T – 0021T, 0024T – 0026T, or 10021 – 69990** (except HCPCS codes listed in the table below) to process and pay. This includes all other revenue code lines on the incoming claim that have the same LIDOS.

#### Computerized Axial Tomography Scans

*2003 Update of HCPCS Codes Used for SNF Consolidated Billing Enforcement (continued)*

75898 75900 75940 75960 75961 75962  
 75964 75966 75968 75970 75978 75980  
 75982 75992 75993 75994 75995 75996

\* Lymphatic procedures are CPT codes 75801 through 75807, and venous procedures are CPT codes 75809 through 75893.

**Outpatient Surgery and Related Services—INCLUSION**

Inclusions, rather than exclusions, are given in this one case, because of the great number of surgery procedures that are excluded and can only be safely performed in a hospital operating room setting. *Procedures associated with splints and casts* are included with minor surgical procedures and appear with an asterisk (\*).

**Note:** Anesthesia, drugs, supplies and laboratory services (revenues codes 037x, 0250, 027x, 062x and 030x) will be bypassed by enforcement edits when billed with outpatient surgeries excluded from SNF CB.

**These CPT/HCPCS Codes May Not Be Paid Separately from SNF PPS**

\*For Part B, these codes are defined as therapy when rendered by a therapist. When rendered by physicians (including nurse practitioners, clinical nurse specialists, or physician assistants), these codes are defined as surgery and may be billed by the rendering provider.

\*\*These HCPCS codes are included in Part A payment when performed alone or with other surgery, but are excluded if they occur with the same LIDOS as an excluded chemotherapy agent.

**Emergency Services**

These services are identified on claims submitted to FIs by a hospital or CAH using revenue code **045x** – emergency room services.

**Ambulance Trips – With Application to Major Category II**

Ambulance trips associated with services in major category II provided in renal dialysis facilities (RDFs) are also excluded from SNF consolidated billing.

A0425 A0426 A0427 A0428 A0429 A0430  
 A0431 A0432 **A0433** A043 **A0435** A0436  
**Q3019 Q3020**

**Major Category II**

**Additional Services Excluded when Rendered to Specific Beneficiaries**

These services must be provided to specific beneficiaries, either: (A) end-stage renal disease (ESRD) beneficiaries, or (B) beneficiaries who have elected hospice, by specific licensed Medicare providers, and are excluded from SNF PPS and consolidated billing.

**SNFs will not be paid for Category II services** (dialysis, EPO, etc.) when the SNF is the place of service, as to receive Medicare payment, these services must be provided in a renal dialysis facility. Hospices must also be the only type of provider billing hospice services.

**Dialysis, EPO and Other Dialysis Related Services for ESRD Beneficiaries**

Specific coding is used to differentiate dialysis and related services that are excluded from SNF consolidated billing for ESRD beneficiaries in three cases:

1. When the services are provided in a RDF (including ambulance services listed under major category I.
2. Home dialysis when the SNF constitutes the home of the beneficiary.
3. When the drug EPO is used for ESRD beneficiaries.

**Note:** SNFs may not be paid for home dialysis supplies.

**Coding Applicable to Services Provided in a RDF**

Institutional dialysis services billed only by a RDF are identified by **type of bill 72x**. Services for method 2 ESRD beneficiaries billed by a RDF must be accompanied by the dialysis related **diagnosis code 585**.

**Coding Applicable to Services Provided in a RDF or SNF as Home**

RDFs, or suppliers use only the following **revenue codes** when billing for home dialysis services for beneficiaries who reside in the SNF:

- \_\_**825** – Hemodialysis OPD/home support services
- \_\_**835** – Peritoneal OPD/home support services
- \_\_**845** – Continuous ambulatory peritoneal dialysis OPD/home support services
- \_\_**855** – Continuous cycling peritoneal dialysis OPD/home support services

HCPCS codes recognized for use with these revenue codes are:

\*\* E1638 is being deleted starting 2003, so a 3-month grace period for billing will last into March 2003.

**Coding Applicable to EPO Services**

EPO is a Medicare-approved drug for use by ESRD beneficiaries. Intermediary EPO claims for ESRD beneficiaries are identified with the following **revenue codes when services are provided in RDF:**

- \_ **634** – EPO with less than 10,000 units
- \_ **635** – EPO with 10,000 or greater units

**Hospice Care for a Beneficiary’s Terminal Illness**

Hospice services for terminal conditions are identified with the following **bill types: 81x or 82x.**

**Major Category III**

**Additional Excluded Services Rendered by Certified Providers**

These services may be provided by any Medicare provider licensed to provide them, **except a SNF**, and are excluded from SNF PPS and consolidated billing.

HCPCS code ranges for chemotherapy, chemotherapy administration, radioisotopes and customized prosthetic devices are set in statute. This statute also gives the Secretary authority to make modifications in the particular codes that are designated for exclusion within each of these service categories; accordingly, the minor and conforming changes in coding that appear in the instruction are made under that authority.

**Chemotherapy Administration**

These codes are included in SNF PPS payment for beneficiaries in a Part A stay when performed alone or with other surgery, but are excluded if they occur with the same line item date of service as an excluded chemotherapy

agent. A chemotherapy agent must also be billed when billing these services, and physician orders must exist to support the provision of chemotherapy.

**Glaucoma Screening**

G0117 G0118

**Major Category V**

**Part B Services Included in SNF Consolidated Billing**

Therapy services are included in SNF PPS and consolidated billing for residents in a Part A stay, and must be billed by the SNF alone for its Part B residents and non-residents.

The following debridement HCPCS codes were incorrectly shown as being billable by a therapist. Effective July 1, 2002, CWF removed the HCPCS codes 11040, 11041, 11042, 11043, and 11044 from the therapy code files used in CWF editing. These HCPCS codes are still listed as included in SNF PPS and CB as ambulatory surgery. There is no distinct technical portion for these HCPCS codes that should have been billed to the FI. Physicians or physician equivalents may continue to bill Medicare carriers for their professional services for these codes:

11040 11041 11042 11043 11044.

Therapies billed with revenues codes 42x (physical therapy), 43x (occupational therapy), 44x (speech-language pathology)

# HOSPITAL OUTPATIENT PROSPECTIVE PAYMENT SYSTEM

## 2003 Update to the Hospital Outpatient Prospective Payment System

The Centers for Medicare & Medicaid Services (CMS) has issued changes to the hospital outpatient prospective payment system (OPPS) for 2003. Unless otherwise noted, all changes discussed in this notification are effective for services furnished on or after January 1, 2003.

### Limitations on Beneficiary Copayment

For calendar year 2003, the national unadjusted copayment amount for an ambulatory payment classification (APC) will be limited to 55 percent of the APC payment rate, as it was in 2002. In addition, the wage-adjusted copayment amount for a service cannot exceed the inpatient hospital deductible amount for 2003 of \$840.

### Outlier Payments

For calendar year 2003, the outlier threshold is reduced from 3.5 to 2.75 times the OPPS payments for the service, and the outlier payment percentage is reduced from 50 percent to 45 percent of the cost in excess of the outlier threshold. In 2003, outlier payments will be made if the cost of providing a service exceeds 2.75 times the OPPS payments for the service, and the amount of the outlier payment will be 45 percent of the amount by which the provider's costs exceed 2.75 times the OPPS payments.

### Outpatient Billing For Dialysis

Generally, Medicare does not allow payment under the OPPS for routine dialysis treatments furnished to end-stage renal disease (ESRD) patients in the outpatient department of a hospital that does not have a certified dialysis facility. However, in certain medical situations in which the ESRD patient cannot obtain her or his regularly scheduled dialysis treatment at a certified ESRD facility, the OPPS rule for 2003 allows payment for nonroutine dialysis treatments furnished to ESRD patients in the outpatient department of a hospital that does not have a certified dialysis facility. Payment is limited to unscheduled dialysis for ESRD patients in the following circumstances:

- Dialysis performed following or in connection with a vascular access procedure.
- Dialysis performed following treatment for an unrelated medical emergency; e.g., if a patient goes to the emergency room for chest pains and misses a regularly scheduled dialysis treatment that cannot be rescheduled, Medicare allows the hospital to provide and bill Medicare for the dialysis treatment.
- Emergency dialysis for ESRD patients who would otherwise have to be admitted as inpatients in order for the hospital to receive payment.

In these situations, non-ESRD certified hospital outpatient facilities are to bill Medicare using a new Healthcare Common Procedure Coding System (HCPCS)

code, G0257 – Unscheduled or emergency treatment for dialysis for ESRD patient in the outpatient department of a hospital that does not have a certified ESRD facility. This new code is assigned to APC 0170, with status indicator “S.”

Hospitals cannot use HCPCS code G0257 to bill for the provision of dialysis treatment to patients with acute renal failure.

Because of current edits that are in effect related to skilled nursing facility (SNF) consolidated billing, dialysis following or in connection with a vascular access procedure will not be separately payable when furnished by a hospital to beneficiaries who are in a covered Part A stay in a SNF.

### Partial Hospitalization Program (PHP)

#### Coding Partial Hospitalization Services

CMS will be updating the provider and intermediary manuals in the near future to identify clearly all the HCPCS codes that are covered and may be billed for PHP patients. In the meantime, in order to avoid billing errors, the following list of the current revenue codes and CPT/HCPCS codes for PHPs is being provided:

| Revenue Codes                      | CPT/HCPCS Codes  |
|------------------------------------|--|
| 250 * – Pharmacy                   | HCPCS code not required  |
| 43x – Occupational Therapy         | G0129  |
| 904 – Activity Therapy             | G0176  |
| 910 – Psychiatric General Services | 90801, 90802, 90875, 90876, 90899  |
| 914 – Individual Psychotherapy     | 90816, 90817, 90818, 90819, 90821, 90822, 90823, 90824, 90826, 90827, 90828, 90829 |
| 915 – Group Therapy                | 90849, 90853, 90857  |
| 916 – Family Psychotherapy         | 90846, 90847, 90849  |
| 918 – Psychiatric Testing          | 96100, 96115, 96117  |
| 942 – Education/Training           | G0177  |

\*Limited to Medicare covered, i.e., not usually self-administered drugs.

### Billing of Services Furnished by Clinical Social Workers (CSWs)

For calendar year 2003, hospitals and community mental health centers (CMHCs) will continue to bill the fiscal intermediary for costs associated with the services of clinical social workers (CSWs) furnished to PHP patients. The fiscal intermediary will continue to pay through the PHP per diem amount.

### Payment Policy When a Surgical Procedure on the Inpatient List Is Performed on an Emergency Basis or When a Patient Whose Status is Outpatient Dies

#### Billing and Payment Rules for Using Modifier CA

Effective January 1, 2003, a new modifier has been added to the list of reportable modifiers under OPPS.

## 2003 Update to the Hospital Outpatient Prospective Payment System (continued)

**CA** Procedure payable only in the inpatient setting when performed emergently on an outpatient who dies prior to admission

To receive payment for a service billed with **modifier CA**, all of the following conditions must be met:

- The status of the patient is outpatient.
- The patient has an emergent, life-threatening condition.
- A procedure on the inpatient list (designated by payment status indicator C) is performed on an emergency basis to resuscitate or stabilize the patient.
- The patient dies without being admitted as an inpatient.

If all of the conditions for payment are met, hospitals can submit a claim using a type of bill 13x for all services that were furnished, including the inpatient procedure (e.g., a procedure designated by OPSS payment status indicator C). Hospitals should include modifier **CA** on the line with the HCPCS code for the inpatient procedure.

Payment for all services on a claim that have the same date of service as the HCPCS code billed with modifier **CA** is made under APC 977. Separate payment is not allowed for other services furnished on the same date.

### Billing and Payment Rules When a Patient Dies

If a patient dies in the emergency department, and the patient's status is outpatient, the hospital should bill for payment under the OPSS for the services that were furnished.

If the emergency department or other physician orders the patient to the operating room for a surgical procedure, and the patient dies in surgery, payment will be made based on the status of the patient.

- If the patient was admitted as an inpatient, the hospital should submit a claim for payment under the hospital inpatient PPS (a DRG-based payment).
- If the patient dies and is not admitted as an inpatient, the hospital should bill for payment under the OPSS for the services that were furnished.
- If the patient dies and is not admitted as an inpatient, and a procedure designated as an inpatient procedure (by OPSS status indicator C) is performed, the hospital should bill for payment under the OPSS for the services that were furnished on that date and should include modifier **CA** on the line with the HCPCS code for the inpatient procedure. Payment for all services, other than the inpatient procedure designated under OPSS by a status indicator C, furnished on the same date is bundled into a single payment under APC 977.

### Billing and Payment Rules When a Procedure Designated as an Inpatient Procedure (by OPSS status indicator C) Is Performed On a Patient Whose Status Is Outpatient

If a procedure designated as an inpatient procedure must be performed on a patient whose status is that of an outpatient, the hospital may:

- Admit the patient and submit an inpatient claim for payment under the inpatient PPS, or

- Admit and transfer the patient to another provider and submit a claim for a per diem DRG rate.

Under the OPSS, a procedure assigned status indicator C (indicating a procedure on the inpatient list) is never payable as an APC. Therefore, if a procedure designated as an inpatient procedure is billed without modifier **CA** for a patient whose status is that of an outpatient, the line on the claim for the procedure with status indicator C will receive a line item denial, and no services furnished on the same date will be paid.

Observation services are outpatient services and do not constitute an inpatient admission. Under the OPSS, a procedure assigned status indicator C (indicating a procedure on the inpatient list) is never payable as an APC. Therefore, if a procedure designated as an inpatient procedure is billed without modifier **CA** for a patient admitted for observation, the line on the claim for the procedure with status indicator C will receive a line item denial, and no services furnished on the same date will be paid.

Modifier **CA** is not to be used to bill for a procedure with status indicator "C" that is performed on an elective basis or scheduled to be performed on a patient whose status is that of an outpatient.

### Documentation Requirements

For a hospital to receive payment when a procedure with OPSS status indicator C is performed and 1) the patient dies without being admitted as an inpatient, or 2) the patient survives the procedure and is admitted as an inpatient and transferred following the procedure, the patient's medical record must contain all of the following information:

- If the patient is transferred, written orders to admit the patient to the hospital performing the procedure and transfer the patient to another hospital following the procedure.
- Documentation that the reported HCPCS code for the surgical procedure with OPSS payment status indicator C was actually performed.
- Documentation that the reported surgical procedure with status indicator C was medically necessary.
- If the patient is admitted as an inpatient and subsequently transferred to another facility, documentation that the transfer was medically necessary, such as the patient requiring postoperative treatment unavailable at the transferring facility.

### New G HCPCS Codes Under OPSS

The table below provides a summary of the new G HCPCS codes that have been issued since the October 2002 OPSS update. These HCPCS codes are effective for services furnished on or after January 1, 2003.

- G0256 Prostate brachytherapy using permanently implanted palladium seeds, including transperitoneal placement of needles or catheters into the prostate, cystoscopy and application of permanent interstitial radiation source  
**Assigned APC: 0649.**

2003 Update to the Hospital Outpatient Prospective Payment System (continued)

- G0257 Unscheduled or emergency treatment for dialysis for ESRD patient in the outpatient department of a hospital that does not have a certified ESRD  
**Assigned APC:0170.**
- G0259 Injection procedure for sacroiliac joint; arthrography
- G0260 Injection procedure for sacroiliac joint; provision of anesthetic, steroid and/or other therapeutic agent and arthrography  
**Assigned APC: 0204.**
- G0261 Prostate brachytherapy using permanently implanted iodine seeds, including transperitoneal placement of needles or catheters into the prostate, cystoscopy and application of permanent interstitial radiation source  
**Assigned APC:0684.**
- G0262 Small intestinal imaging; intraluminal, from ligament of Treitz to the ileo cecal valve, includes physician interpretation and report  
**Assigned APC: 0711.**  
**Note:** Code created to describe a new diagnostic test for which there is no existing code.
- G0263 Direct admission of patient with diagnosis of congestive heart failure, chest pain or asthma for observation services that meet all criteria for G0244
- G0264 Initial nursing assessment of patient directly admitted to observation with diagnosis other than congestive heart failure, chest pain, or asthma or patient directly admitted to observation with diagnosis of congestive heart failure, chest pain or asthma when the observation stay does not meet all criteria for G0244  
**Assigned APC: 0600.**
- G0265 Cryopreservation, freezing and storage of cells for therapeutic use, each cell line
- G0266 Thawing and expansion of frozen cells for therapeutic use, each aliquot
- G0267 Bone marrow or peripheral stem cell harvest, modification or treatment to eliminate cell type(s) (e.g. T-cells, metastatic carcinoma)
- G0268 Removal of impacted cerumen (one or both ears) by physician on same date of service as audiologic function testing  
**Assigned APC: 0340.**
- G0269 Placement of occlusive device into either a venous or arterial access site, post surgical or interventional procedure (e.g., angioseal plug, vascular plug)
- G0270 Medical nutrition therapy; reassessment and subsequent intervention(s) following second referral in same year for change in diagnosis, medical condition, or treatment regimen (including additional hours needed for renal disease), individual, face to face with the patient, each 15 minutes  
**Note:** Must be billed to the Medicare carrier (not intermediary) prior to April 1, 2003.
- G0271 Medical nutrition therapy, reassessment and subsequent intervention(s) following second referral in same year for change in diagnosis, medical condition, or treatment regimen (including additional hours needed for renal disease) group (2 or more individuals), each 30 minutes  
**Note:** Must be billed to the Medicare carrier (not intermediary) prior to April 1, 2003.
- G0272 Naso/oro gastric tube placement, requiring physician's skill and fluoroscopic guidance (includes fluoroscopy, image documentation and report)  
**Assigned APC: 0272.**  
**Note:** Code created because there is no existing code for this service.
- G0273 Radiopharmaceutical biodistribution, single or multiple scans on one or more days, pre-treatment planning for radiopharmaceutical therapy of non-Hodgkin's lymphoma, includes administration of radiopharmaceutical (e.g., radiolabeled antibodies)  
**Assigned APC: 0718.**
- G0274 Radiopharmaceutical therapy, non-Hodgkin's lymphoma, includes administration of radiopharmaceutical (e.g. radiolabeled antibodies)  
**Assigned APC: 0725.**  
**Note:** Code created because there is no existing code for this service.
- G0275 Renal angiography (unilateral or bilateral) performed at the time of cardiac catheterization, includes catheter placement in the renal artery, injection of dye, flush aortogram and radiologic supervision and interpretation and production of images (List separately in addition to primary procedure)
- G0278 Iliac artery angiography performed at the same time of cardiac catheterization, includes catheter placement in the iliac artery, injection of dye, radiologic supervision and interpretation and production of images (List separately in addition to primary procedure)
- G0279 Extracorporeal shock wave therapy; involving elbow epicondylitis  
**Note:** New code paid under the therapy fee schedule.
- G0280 Extracorporeal shock wave therapy; involving other than elbow epicondylitis or plantar fasciitis  
**Note:** New code paid under the therapy fee schedule.
- G0288 Reconstruction, computed tomographic angiography of aorta for surgical planning for vascular surgery  
**Assigned APC:0975.**  
**Note:** Code replaces C9708.

2003 Update to the Hospital Outpatient Prospective Payment System (continued)

- G0289 Arthroscopy, knee, surgical, for removal of loose body, foreign body, debridement/shaving of articular cartilage (chondroplasty) at the time of other surgical knee arthroscopy in a different compartment of the same knee
- G0290 Transcatheter placement of a drug eluting intracoronary stent(s), percutaneous, with or without other therapeutic intervention, any method; single vessel
- G0291 Transcatheter placement of a drug eluting intracoronary stent(s), percutaneous, with or without other therapeutic intervention, any method; each additional vessel
- G0292 Administration of experimental drug(s) only in a Medicare qualifying clinical trial (includes administration for chemotherapy and other types of therapy via infusion and/or other than infusion), per day  
**Assigned APC:0708.**
- G0293 Noncovered surgical procedure(s) using conscious sedation, regional, general or spinal anesthesia in a Medicare qualifying clinical trial, per day  
**Assigned APC:0710.**
- G0294 Noncovered surgical procedure(s) using either no anesthesia or local anesthesia only, in a Medicare qualifying clinical trial, per day  
**Assigned APC:0707.**
- G0295 Electromagnetic stimulation, to one or more areas  
**Note:** Service not covered under Medicare.

**Billing Instructions for the G code for Earwax Removal**

Hospitals performing earwax removal on a beneficiary on the same day as audiologic function testing (CPT codes 92553 through 92598, except for noncovered codes 92559 and 92560) must use G0268 to report earwax removal. Reporting of G0268 indicates that a physician removed the earwax at a separate encounter from the audiologic function testing. If 69210 is reported, payment for the earwax removal will be denied.

**Billing for Prostate Brachytherapy**

The two new G codes for prostate brachytherapy, G0256 and G0261, include payment for transperineal placement of needles and/or catheters into the prostate, cystourethroscopy, radioelement application, and implanted brachytherapy sources. Therefore, hospitals must not report CPT codes 55859 and 77776-77778 in addition to either of the G code. Additionally, hospitals must not separately report any HCPCS for brachytherapy sources in addition to one of the G codes. Lastly, hospitals should report only one G code for this service. As with other procedure codes, post operative recovery and/or observation, is packaged into payment for the procedure. Other services provided during the performance of prostate brachytherapy (e.g. intraoperative ultrasound, laboratory testing, diagnostic services) are separately payable and should be separately reported. The G codes should be reported with only one unit of service.

Hospitals must not use these G codes to report prostate brachytherapy that does not utilize implantable sources (e. g. remote afterloading high intensity brachytherapy, CPT codes 77781-77784). Remote afterloading high intensity brachytherapy is reported with the use of appropriate CPT codes.

**Billing for Stereotactic Breast Biopsy**

Stereotactic breast biopsy must be reported using the appropriate CPT code (e.g., 19103). Radiological or ultrasound guidance for the biopsy should be reported separately using the appropriate CPT code.

**Billing for Radiologic or Ultrasound Guidance**

Hospitals must separately report radiological or ultrasound guidance, using the appropriate CPT code in addition to the HCPCS code for the procedure with which it is used.

**Billing for Active Wound Care Procedures**

CPT code 97601 is a physical therapy service and is paid under the Medicare physician fee schedule. Payment for CPT code 97602 is recognized under the OPSS as a packaged service, i.e., the service is not separately paid under OPSS; however, the cost of the service is packaged into whatever other service is provided on that date. It is common for 97602 to be performed at the time of another physical therapy service in which case payment for 97602 is packaged into payment for the other physical therapy service. If a service coded under 97602 is performed at the time of a clinic or emergency visit, the evaluation/management service must be documented in accordance with the hospital's documentation guidelines for clinic and emergency visits. If the only service provided to a beneficiary is 97602, the hospital may bill outpatient visit code 99211. Payment for 97602 will be packaged into the payment for 99211. If a hospital provides and bills for 97601 or 97602 and a clinic or emergency department visit, the clinic or emergency visit must be separately identifiable and documented in accordance with the hospital's guidelines for documenting clinic and emergency visits.

**Sacroiliac Joint Injections**

CPT code 27096, *Injection procedure for sacroiliac joint, arthrography and/or anesthetic steroid*, describes two distinct procedures, one used with diagnostic procedures and the other therapeutic. The code is properly packaged when used for diagnostic injections, but should be separately payable when used to report a therapeutic injection. Therefore, in order to facilitate appropriate reporting and payment for the procedures described by CPT code 27096, two new codes have been created: G0259 – Injection procedure for sacroiliac joint, arthrography, and G0260 – Injection procedure for sacroiliac joint, provision of anesthetic and/or steroid. G0259 is a packaged service and G0260 is assigned to APC 0204.

**Drug Eluting Stents**

Effective for services furnished on or after April 1, 2003, contingent upon their prior approval by the Food and Drug Administration (FDA), Medicare is implementing payment under APC 656, Transcatheter Placement of Drug-Eluting Coronary Stents, for two temporary HCPCS codes that describe drug-eluting stents:

2003 Update to the Hospital Outpatient Prospective Payment System (continued)

G0290 and G0291.

Payment for HCPCS codes G0290 and G0291 under APC 0656 will not be implemented **before April 1, 2003**.

- If the FDA approves the drug-eluting stents **before January 1, 2003**, hospitals should hold claims containing these HCPCS codes for services furnished on or after January 1, 2003 through March 31, 2003 until after April 1, 2003. If a hospital furnishes additional services that would be reported on the same claim as the codes for the insertion of drug-eluting stents (G0290 and G0291), they may wish to remove those codes from the claim in order to receive payment for the remaining services. In this instance, the hospital would have to submit an adjustment bill after April 1 2003 that includes the new HCPCS code(s) for insertion of the drug-eluting stents.
- If the FDA approves the drug-eluting stents **after December 31, 2002 but before April 1, 2003**, and a hospital, subsequent to their approval by the FDA, uses drug-eluting stents for services furnished in an outpatient setting prior to April 1, 2003, payment for placement of the stents will be made under APC 0104.
- If the FDA does not grant approval of drug-eluting stents **by April 1, 2003**, Medicare will announce a new effective date for APC 0656 and for HCPCS codes G0290 and G0291.

**Outpatient Services Under Clinical Trials**

There are three new G codes for use in reporting services furnished in hospital outpatient departments under national clinical trials:

G0292, G0293 and G0294.

On September 19, 2000, Medicare issued a national coverage decision stating that Medicare will pay for the routine costs of clinical trials. This policy is published as section 30-1 of Medicare's Coverage Issues Manual (CMS-Pub.6). Because the experimental intervention is not covered, but items and services required solely because of the intervention are covered, Medicare needed to identify ways to properly code for and pay for the routine costs when delivered in a hospital outpatient department.

To pay accurately for the covered services associated with the administration of drugs as part of a clinical trial, Medicare created a new code to allow for correct billing and payment for routine costs, as defined by the national coverage determination. Therefore, HCPCS code G0292 must be billed when only experimental drugs are administered as part of a Medicare qualifying clinical trial. When an experimental drug is being administered in conjunction with payable drugs or on the same day as payable drugs, G0292 must not be used. Instead, the appropriate drug administration code must be billed.

There are also procedures that may be performed in the hospital outpatient department as part of a qualifying clinical trial. Because the intervention is not covered under Medicare's clinical trial policy, Medicare needed a mechanism to pay the hospital for its covered fixed costs associated with providing the service under the clinical

trial. Medicare has created two codes to allow for correct billing of procedures performed as the focus of qualifying clinical trials, HCPCS G0293 and G0294.

ICD-9 diagnosis code V70.7 must be reported on the claim as a diagnosis other than the primary diagnosis in order for hospitals to bill for G0292, G0293 and G0294. All three of these codes are for OPSS use only. Other provider types may not bill these codes.

**Placement of Occlusive Device**

HCPCS code G0269 device was developed to ensure proper reporting of this service. This service was being inappropriately reported with codes for such procedures as "blood vessel repair" and "repair of arterial pseudoaneurysm." This service is a packaged service under OPSS.

**Radiopharmaceutical Biodistribution of Zevalin**

A new code, HCPCS G0273 has been created to describe radionuclide scanning to determine the biodistribution of Zevalin. The procedure encompasses administration of Indium labeled Zevalin and whole body radionuclide scanning 2 - 24 hours and 48 - 72 hours after administration of Zevalin. Rarely, a third scan is necessary. The purpose of the scanning is to ensure that the biodistribution of Zevalin is normal, thus decreasing the risk of toxic effects from administration of a therapeutic dose of Zevalin. The published criteria for determining appropriate biodistribution involve making a qualitative comparison of isotope uptake in several organ systems between the two scans. Therefore, these scans cannot be read in isolation and this code should be reported only once no matter how many scans are performed.

This code includes the administration of the radiopharmaceutical and performance of all scans. Also note that the infusion of rituxumab prior to the administration of Zevalin is separately payable.

When billing G0273 and G0274 for Zevalin, the payment amount includes payment for both the procedure and the radiopharmaceutical. For diagnostic administration of Zevalin, G0273, CPT codes for diagnostic administration of radiopharmaceuticals (78990 and 78999) and diagnostic scanning must not be reported (78800 -78803). For therapeutic administration of Zevalin G0274, CPT codes for therapeutic administration of radiopharmaceuticals (79900), radiopharmaceutical therapy (79100, 79400), and infusion or instillation of radioelement solution (77750) must not be reported.

**Renal and Iliac Angiography Performed with Cardiac Angiography**

The add-on HCPCS codes G0275 and G0278 have been created to assure proper reporting of and payment for renal and iliac angiography performed at the time of cardiac angiography. These codes must be listed separately in addition to primary procedure.

These procedures are performed frequently on Medicare patients and are currently reported using codes that describe placement of a catheter in the renal and/or iliac artery(s) (CPT codes 36245 and 36246) and radiological supervision and interpretation of renal and/or iliac

2003 Update to the Hospital Outpatient Prospective Payment System (continued)

angiography (CPT codes 75710, 75716, 75722, and 75724). CPT codes 36245, 36246 75710, 75716, 75722, and 75724 must not be used to report these procedures. The new codes, G0275 and G0278, are packaged services under OPSS.

**Arthroscopic Procedures of the Knee**

HCPCS code G0289 has been created to permit appropriate reporting of arthroscopic procedures performed in different compartments of the same knee during the same operative session.

This is an add-on code and must be added to the knee arthroscopy code for the major procedure being performed. This code is only to be reported once per extra compartment, even if chondroplasty, loose body removal, and foreign body removal are all performed. The code may be reported twice (or with a unit of two) if the physician performs these procedures in two compartments in addition to the compartment where the main procedure was performed.

HCPCS code G0289 must be reported only when the physician spends at least 15 minutes in the additional compartment performing the procedure. It must not be reported if the reason for performing the procedure is due to a problem caused by the arthroscopic procedure itself. This code is to be used when a procedure is performed in the lateral, medial, or patellar compartments in addition to the main procedure. Medicare does not allow billing of CPT codes 29874, *Arthroscopy, knee, surgical; for removal of loose body or foreign body (e.g., osteochondritis dissecans fragmentation, chondral fragmentation)* and 29877, *Arthroscopy, knee, surgical; debridement/shaving of articular cartilage (chondroplasty)* with other arthroscopic procedures on the same knee. The new code is a packaged service under OPSS. CPT code 29874 must not be used to report the services described by the new code G0289.

**Billing for Radiation Therapy (CPT Codes 77401 through 77416)**

CPT codes 77401 through 77416 are to be reported only once per date of service. Furthermore, only one of

these codes may be reported per date of service per patient. CPT codes 77402 through 77406 describe treatment delivery for a single treatment area. CPT codes 77407 through 77411 describe treatment delivery to two treatment areas. CPT codes 77412 through 77416 describe treatment delivery to three or more treatment areas. In the cases of CPT codes 77407 through 77416 the radiation delivered to each treatment area is added and the sum determines which code to report. For example, if three treatment areas are each treated with 11 MeV, then the proper code to bill is 77416 for "20 MeV or greater." It is incorrect to report 77414 (for "11-19 MeV") three times.

**Hospital OPSS Modifiers**

CMS requires the reporting of CPT Level I and HCPCS Level II modifiers for accuracy in reimbursement, coding consistency, editing, and capturing payment data for constructing Medicare outpatient groups for the OPSS.

Effective January 1, 2003, a new Level II modifier has been added to the list of reportable modifiers under the OPSS.

- CA Procedure payable only in the inpatient setting when performed emergently on an outpatient who expires prior to admission

Below is a listing of all the modifiers that are reported under the OPSS as of January 1, 2003:

**Level I (CPT)**

|    |    |    |    |    |    |    |    |
|----|----|----|----|----|----|----|----|
| 25 | 27 | 50 | 52 | 58 | 59 | 73 | 74 |
| 76 | 77 | 78 | 79 | 91 |    |    |    |

**Level II (HCPCS)**

|    |    |    |    |    |    |    |    |    |    |
|----|----|----|----|----|----|----|----|----|----|
| CA | E1 | E2 | E3 | E4 | FA | F1 | F2 | F3 | F4 |
| F5 | F6 | F7 | F8 | F9 | GA | GG | GH | GY | GZ |
| LC | LD | LT | QM | QN | RC | RT | TA | T1 | T2 |
| T3 | T4 | T5 | T6 | T7 | T8 | T9 | ❖  |    |    |

## Billing and Payment Requirements for Observation Services

Under the outpatient prospective payment system (OPPS), hospitals are required to bill for observation services in one of two ways:

- 1) As packaged services, or
- 2) As a separately payable ambulatory payment classification (APC) when certain conditions are met for patients having diagnoses of chest pain, asthma, or congestive heart failure, for whom observation services are furnished.

### Changes in Billing and Payment Requirements for Observation Services

Hospitals may bill for patients who are “direct admissions” to observation. A “direct admission” occurs when a physician in the community refers a patient to the hospital for observation, bypassing the clinic or emergency department (ED). Effective for services furnished **on or after January 1, 2003**, hospitals may bill for patients directly admitted for observation services using one of the following HCPCS codes:

- G0263 Direct admission of patient with diagnosis of congestive heart failure, chest pain or asthma for observation services that meet all criteria for G0244.
- G0264 Initial nursing assessment of patient directly admitted to observation with diagnosis other than congestive heart failure, chest pain, or asthma or patient directly admitted to observation with diagnosis of congestive heart failure, chest pain or asthma when the observation stay does not meet all criteria for G0244.

The determination of whether use of G0263 is appropriate will be made after reviewing all diagnoses submitted on the claim (e.g., admission, principal, and secondary diagnoses).

Code G0263 must be billed with G0244. Although code G0263 is treated as a packaged service and will not generate a payment under OPPS, the code will be recognized as taking the place of a visit or critical care code in meeting the observation criteria for patients directly admitted to observation.

Code G0264 should not be billed with code G0244. HCPCS code G0264 is assigned to APC 0600 and is paid the same amount as a low-level clinic visit. This code provides a way to recognize and pay for the initial nursing assessment and any packaged observation services attributable to patients that are directly admitted to observation but whose observation services do not meet the criteria necessary to qualify for a separate observation payment.

**Effective January 1, 2003**, HCPCS code G0258 – *Intravenous infusion(s) during separately payable observation stay, per observation stay (must be reported with G0244)*, is deleted from the OPPS. Hospitals must bill for infusion therapy provided during a separately payable observation stay (HCPCS code G0244) using HCPCS code Q0081 – *Infusion therapy, using other than chemotherapeutic drug*. As with code G0258, HCPCS code Q0081 may be reported for infusions started in the emergency department, clinic or observation area, so long

as the infusion continues during the observation stay. An edit has been installed in the outpatient code editor (OCE) software to allow payment, effective for services furnished on or after April 1, 2002, for HCPCS code G0244 when billed with Q0081, subject to all other conditions for payment having been met.

### Billing Requirements for Packaged Observation Services (for patients other than those with diagnoses of asthma, chest pain, or congestive heart failure)

Hospitals are required to report observation charges under revenue code 762 – Observation Room. HCPCS coding is not required but if reported, the appropriate CPT codes are 99217 through 99220 and 99234 through 99236.

In the “units” field, hospitals must enter the number of hours the outpatient is in observation status.

Hospitals must report laboratory, radiology, or other diagnostic services under revenue codes 30x, 31x, 32x, etc., as appropriate.

When a physician in the community orders that an outpatient be directly admitted to observation, without going through the hospital’s emergency department or clinic, the hospital must bill for the direct admission using HCPCS code G0264. Hospitals should report G0264 under revenue code 762.

Hospitals must use HCPCS code G0264 to bill for an outpatient directly admitted to observation with a diagnosis of asthma, congestive heart failure or chest pain that does not qualify for G0244 because the required criteria are not fully met, e.g., the observation stay was less than eight hours, the qualifying diagnostic tests were not performed, etc.

### Billing Requirements to Receive Separate Payment Under APC 339

Hospitals must report HCPCS code G0244 – *Observation care provided by a facility to a patient with CHF, chest pain, or asthma, minimum eight hours, maximum forty-eight hours*, to bill for separate payment under APC 339 for observation services furnished to patients with diagnosis of asthma, chest pain, or congestive heart failure.

### Admission requirements to bill for separate observation payment effective January 1, 2003

Hospitals must bill **either** an emergency department visit (APC 0610, 0611, or 0612), **or** a clinic visit (APC 0600, 0601, or 0602), **or** critical care (APC 620), **or** HCPCS code with each bill for separate observation payment using HCPCS G0244.

To receive separate payment for G0244, hospitals must bill an evaluation/management (E/M) code for an emergency room, clinic visit or critical care on the day before or the day that the patient is admitted to observation.

If hospitals bill for more than one period of observation on a single claim, each observation period must be paired with a separate E/M visit.

Hospitals must bill the E/M code associated with observation on the same claim as the observation service.

Hospitals must use **modifier 25** with the E/M code in order to receive payment for G0244.

**Billing and Payment Requirements for Observation Services (continued)**

Effective for services furnished **on or after January 1, 2003**, when a patient with congestive heart failure, chest pain, or asthma is a “direct admission” to observation, hospitals must bill HCPCS code G0263 or G0264 as appropriate.

A “direct admission” occurs when a physician in the community refers a patient to the hospital for observation, bypassing the clinic or emergency department (ED).

Hospitals must use modifier 25 with G0263 in order to receive payment for G0244.

Hospitals should bill G0263 and G0264 with revenue code 762.

**Diagnoses Required for Separate Observation Payment**

When billing for separate payment for observation services using HCPCS code G0244, hospitals must include at least one of the ICD-9-CM diagnoses listed below on the bill as the admitting, primary, or secondary diagnosis.

**Required Diagnoses For Chest Pain:**

- 411.0 Postmyocardial infarction syndrome
- 411.1 Intermediate coronary syndrome
- 411.81 Coronary occlusion without myocardial infarction
- 411.89 Other acute ischemic heart disease
- 413.0 Angina decubitus
- 413.1 Prinzmetal angina
- 413.9 Other and unspecified angina pectoris
- 786.05 Shortness of breath
- 786.50 Chest pain, unspecified
- 786.51 Precordial pain
- 786.52 Painful respiration
- 59.59 Other chest pain

**Required Diagnoses For Asthma:**

- 493.01 Extrinsic asthma with status asthmaticus
- 493.02 Extrinsic asthma with acute exacerbation
- 493.11 Intrinsic asthma with status asthmaticus
- 493.12 Intrinsic asthma with acute exacerbation
- 493.21 Chronic obstructive asthma with status asthmaticus
- 493.22 Chronic obstructive asthma with acute exacerbation
- 493.91 Asthma, unspecified with status asthmaticus
- 92.92 Asthma, unspecified with acute exacerbation

**Required Diagnoses For Congestive Heart Failure:**

- 391.8 Other acute rheumatic heart disease
- 398.91 Rheumatic heart failure (congestive)
- 402.01 Malignant hypertensive heart disease with congestive heart failure
- 402.11 Benign hypertensive heart disease with congestive heart failure
- 402.91 Unspecified hypertensive heart disease with congestive heart failure
- 404.01 Malignant hypertensive heart and renal disease with congestive heart failure
- 404.03 Malignant hypertensive heart and renal disease with congestive heart and renal failure
- 404.11 Benign hypertensive heart and renal disease with congestive heart failure

- 404.13 Benign hypertensive heart and renal disease with congestive heart and renal failure
- 404.91 Unspecified hypertensive heart and renal disease with congestive heart failure
- 404.93 Unspecified hypertensive heart and renal disease with congestive heart and renal failure
- 428.0 Congestive heart failure
- 428.1 Left heart failure
- 428.20\* Unspecified systolic heart failure
- 428.21\* Acute systolic heart failure
- 428.22\* Chronic systolic heart failure
- 428.23\* Acute on chronic systolic heart failure
- 428.30\* Unspecified diastolic heart failure
- 428.31\* Acute diastolic heart failure
- 428.32\* Chronic diastolic heart failure
- 428.33\* Acute on chronic diastolic heart failure
- 428.40\* Unspecified combined systolic and diastolic heart failure
- 428.41\* Acute combined systolic and diastolic heart failure
- 428.42\* Chronic combined systolic and diastolic heart failure
- 428.43\* Acute on chronic combined systolic and diastolic heart failure
- 428.9 Heart failure, unspecified

\*Denotes new ICD-9-CM codes effective October 1, 2002.

**Diagnostic Tests Required for Separate Observation Payment**

In order to receive separate payment for observation services billed using HCPCS G0244, hospitals must furnish and bill for specific diagnostic services typically performed on patients requiring observation care for the three specified conditions. Hospitals must perform the specified diagnostic services within the dates of the E/M visit plus the first 24 hours of observation and must bill for the diagnostic services on the same claim as the observation services to which they are related. The required diagnostic tests are as follows:

- For chest pain, at least two sets of cardiac enzymes (**either** two CPK (82550, 82552, or 82553), **or** two troponin (84484 or 84512), and two sequential electrocardiograms (93005).
- For asthma, a breathing capacity test (94010) **or** pulse oximetry (94760 or 94761 or 94762).
- For congestive heart failure, a chest X-ray (71010, 71020, or 71030) **and** an electrocardiogram (93005) and pulse oximetry (94760, 94761, or 94762).

**Note:** Pulse oximetry codes 94760, 94761, and 94762 are treated as packaged services under the OPPS. Although no separate payment is made for packaged codes, hospitals must separately report the HCPCS code and a charge for pulse oximetry in order to establish that observation services for congestive heart failure and asthma diagnoses meet the criteria for separate payment.

*Billing and Payment Requirements for Observation Services (continued)*

**Additional billing requirements**

In order to receive payment for G0244, hospitals must bill observation services for a minimum of 8 hours up to a maximum of 48 hours. In billing for observation services, hospitals should enter as units of service for G0244 the number of hours the patient spends in observation.

Hospitals must not use G0244 to bill for observation services of less than eight hours. Observation services of less than eight hours must be billed as packaged services using revenue code 762.

If a period of observation spans more than one calendar day, hospitals must include all of the hours for the entire period of observation on a single line and enter as the date of service for that line the date the patient is admitted to observation.

Observation time begins at the clock time appearing on the nurse's observation admission note, which should coincide with the initiation of observation care or with the time of the patient's arrival in the observation unit.

Observation time ends at the clock time documented in the physician's discharge orders, or, in the absence of such a documented time, the clock time when the nurse or other appropriate person signs off on the physician's discharge order. This time should coincide with the end of the patient's period of monitoring or treatment in observation.

The medical record must document that the beneficiary was under the care of a physician during the period of observation, as indicated by admission, discharge, and other appropriate progress notes that are timed, written, and signed by the physician.

Effective for services furnished on or after January 1, 2003, hospitals must discontinue using HCPCS code G0258 to bill for intravenous infusion(s) furnished during a separately payable observation stay that is billed using G0244. Rather, hospitals must use HCPCS code Q0081, when billing for an infusion furnished during the observation stay. Hospitals may resubmit claims that were denied for services furnished on or after April 1, 2002 through December 31, 2002 because G0244 is billed with Q0081.

**Requirements Affecting Separate Payment Under APC 339 for Observation Services Furnished to Patients With Diagnosis of Asthma, Chest Pain, or Congestive Heart Failure**

If more than one nonoverlapping observation is billed on a single claim, each of which meets the required conditions for payment, each observation is paid separately.

Separate payment for observation services meeting the required conditions is allowed only when billed on a 13x bill type.

Separate payment is allowed for any service that is separately payable under the OPPS, that is, procedures with status indicators S, X, K, G, V, or H, when billed with G0244.

Payment for G0244 is **not** allowed if a surgical procedure or any service that has a status indicator of "T" (with the exception of Q0081) occurs on the day before or the day that the patient is admitted to observation.

Data in the admitting diagnosis field (form locator number 76 or its electronic equivalent) will be captured for use in outpatient claims processing as of January 1, 2003. The admitting diagnosis will be taken into account in determining separate observation payment for services furnished on or after April 1, 2002, when the bill is submitted or resubmitted, or when an adjustment bill is submitted after January 1, 2003.

Separate payment is allowed for multiple observation periods on a claim if the required criteria are met for each observation.

If there are multiple observation periods for the same diagnoses, each of the required diagnostic tests must be performed multiple times, i.e., the tests must be rerun for each period of observation. Therefore, if a claim contains two separate periods of observation related to chest pain, four EKGs and four cardiac enzyme tests must be performed.

If multiple observations are for different diagnoses, the re-use of tests is allowed. For example, if there are two periods of observation on a claim, one for chest pain and one for congestive heart failure, two EKGs, not three, are needed. The EKGs that are performed to meet the diagnostic test requirements for observation related to chest pain may also be used for the observation related to congestive heart failure.

No separate payment is allowed for any hours a beneficiary spends in observation over 24 hours; all costs beyond 24 hours will be included in the APC payment for observation services.

If all criteria for G0244 are not met, the claim will be returned to the provider. The hospital may resubmit the claim reporting the observation services under revenue code 762 alone or with CPT codes 99217 through 99220 or 99234 through 99236.

Payment for G0264 is made under APC 600. Although no separate payment is made for G0263, charges billed with G0263 are packaged in determining costs associated with APC 339. ❖

## Pass-Through Devices

Below is a complete listing of the device categories that are reportable under the hospital outpatient prospective payment system (OPPS) as of January 1, 2003. If a device is described by one of the existing device categories but is packaged as a component of a system, only the device that meets the pass-through criteria would be eligible for pass-through payment under the appropriate category.

C-codes C1884, C2614, and C2632 are new pass-through categories reportable under the OPPS effective January 1, 2003.

|   | HCPSC Codes | Category Descriptor   | Effective Date | APC  |
|---|-------------|---|----------------|------|
| 1 | C1765*      | Adhesion barrier  | 7/1/01         |      |
| 2 | C1783       | Ocular implant, aqueous drainage assist device              | 7/1/02         |      |
| 3 | C1884       | Embolization Protective System                              | 1/1/03         | 1884 |
| 4 | C1888       | Catheter, ablation, non-cardiac, endovascular (implantable) | 7/1/02         |      |
| 5 | C1900       | Lead, left ventricular coronary venous system               | 7/1/02         |      |
| 6 | C2614       | Probe, percutaneous lumbar discectomy                       | 1/1/03         | 2614 |
| 7 | C2618       | Probe, cryoablation   | 4/1/01         |      |
| 8 | C2632       | Brachytherapy solution, iodine -125, per mCi                | 1/1/03         | 2632 |

### Explanation of Terms/Definitions for Specific Category Codes

**Adhesion barrier (C1765)** – A bioresorbable substance placed on and around the neural structures, which inhibits cell migration (fibroblasts) and minimizes scar tissue formation. It is principally used in spine surgeries, such as laminectomies and discectomies.

**Catheter, ablation, non-cardiac, endovascular (C1888)** – a radiofrequency catheter designed to occlude or obliterate blood vessels (e.g., veins).

**Embolization protective system (C1884)** – A system designed and marketed for use to trap, pulverize, and remove atheromatous or thrombotic debris from the vascular system during an angioplasty, atherectomy, or stenting procedure.

**Left ventricular coronary venous system lead (C1900)** – Designed for left heart placement in a cardiac vein via the coronary sinus and is intended to treat the symptoms associated with heart failure.

### Billing for Devices for Which C-codes Have Expired

Effective January 1, 2003, 95 pass-through device categories have expired and are no longer reportable. The list of device categories with expiration dates of December 31, 2002, was published in the Fourth Quarter 2002 *Medicare A Bulletin* (pages 102-105).

With the exception of C1716, C1718, C1719, C1720 and C2616, the respective “C” HCPCS codes for the device categories cannot be reported after December 31, 2002.

The expiring “C” codes do not have a 90-day grace period. Any claims that contain these codes will be returned to the hospitals. The Outpatient Code Editor will return the claim to the hospital so that the hospital may remove the expired pass-through device HCPCS code.

Hospitals can resubmit the charge for the device with either no HCPCS code or, at the hospital’s option, with a current HCPCS code, if one exists for the device. Hospitals are not required to bill using a HCPCS code, but they may do so. Hospitals must use one of the following revenue codes when billing for devices that are not pass-through devices: 272, 275, 276, 278, 279, 280, 289, or 624. Revenue codes 274 and 290, which are acceptable codes for reporting pass-through devices, always require HCPCS codes. If the non-pass-through device is an implantable orthotic or prosthetic device or implantable durable medical equipment, the device must be reported under a revenue code other than 274 or 290, for example 278 – other implants.

The code for cochlear implant system, L8614, is a permanent HCPCS code that will not expire. Although the cochlear implant system device category will expire for pass-through payment purposes, the code may continue to be reported after December 31, 2002. Beginning January 1, 2003 charges reported with L8614 will be considered as charges attributable to a packaged device under OPPS.

Only one unit may be reported under code C2616, *Brachytherapy seed, Yttrium-90*. Claims containing more than one unit for this code will be returned to the hospital.

Although a device may no longer be eligible for pass-through payment and may no longer have a reportable HCPCS code, it is essential that hospitals continue to include a charge on the claim for any device they furnish, either as part of the charge for the procedure or as a separate charge billed under a device revenue code. This is equally important for devices that have never been eligible for pass-through payments. Hospitals are required to bill for packaged devices to ensure that the cost of the device is taken into account in determining the hospital’s transitional corridor and outlier payments and that all device costs are included in the data Medicare uses in updating APC payments for the procedure in the future. Hospitals have the option of whether or not to bill using HCPCS codes for packaged devices. However, hospitals must be aware that for purposes of future APC rate-setting for procedures that use devices, Medicare will include in calculating the median cost of a procedure the cost of all devices that appear on claims whether billed using a HCPCS code or billed with only a revenue code.

### General Coding, Billing Instructions and Explanations For Pass-Through Devices

**C1900 – Left ventricular coronary venous system lead** – This code should be reported with *CPT* codes 33224 and 33225. The APC assignments for these two *CPT* codes do not include payment for the pass-through device.

**Devices Implanted, Removed, and Implanted Again, Not Associated With Failure (Applies to Transitional Pass-through Devices Only)** – In instances where the physician is required to implant another device because the first device fractured, the hospitals

**Pass-Through Devices (continued)**

may bill for both devices – the device that resulted in fracture and the one that was implanted into the patient. Medicare realizes that there may be instances where an implant is tried but later removed due to the device’s inability to achieve the necessary surgical result or due to inappropriate size selection of the device by the physician (e.g., physician implants an anchor to bone and the anchor breaks because the bone is too hard or must be replaced with a larger anchor to achieve desirable result). In such instances, Medicare will provide separate reimbursement for both devices. This situation does not extend to devices that result in failure or are found to be defective. For failed or defective devices, hospitals are advised to contact the vendor/manufacturer.

**Note:** This applies to transitional pass-through devices only and not to devices packaged into an APC.

**Kits** – Manufacturers frequently package a number of individual items used in a particular procedure in a kit. Generally, to avoid complicating the category list unnecessarily and to avoid the possibility of double coding, Medicare has not established codes for such kits. However, hospitals are free to purchase and use such kits. If the kits contain individual items that separately qualify for transitional pass-through payments, these items may be separately billed using applicable codes. Hospitals may not bill for transitional pass-through payments for supplies that may be contained in kits.

**Multiple units** – Hospitals must bill for multiple units of items that qualify for transitional pass-through payments when such items are used with a single procedure by entering the number of units used on the bill.

**Reprocessed devices** – Hospitals may bill for transitional pass-through payments only for those devices that are “single use.” Reprocessed devices may be considered “single use” if they are reprocessed in compliance with enforcement guidance of the Food and Drug Administration (FDA) relating to the reprocessing of devices applicable at the time the service is delivered. The FDA is phasing in new enforcement guidance relating to reprocessing during 2001 and 2002. For further information, see FDA’s guidance document entitled “Enforcement Priorities for Single-Use Devices Reprocessed by Third Parties and Hospitals,” published August 14, 2000, and subsequent FDA guidance or regulatory documents.

**Changes to Pass-Through Drugs, Biologicals and Radiopharmaceuticals HCPCS Replacements Codes for Retiring Pass-Through Drugs**

The HCPCS codes listed in the left column are being retired effective December 31, 2002; however, because of the grace period hospitals have for reporting the new 2003 HCPCS codes, these codes are in effect for hospital outpatient billing for drugs furnished through March 31, 2003. Beginning April 1, 2003, these codes are no longer reportable under the hospital OPSS. These codes have been replaced with new HCPCS codes indicated in the

column titled “New HCPCS” effective April 1, 2003, and will be reportable under the hospital OPSS.

| Old HCPCS | APC  | New HCPCS | APC  |
|-----------|------|-----------|------|
| C1012     | 1012 | P9033     | 0954 |
| C1013     | 1013 | P9031     | 1013 |

| C9100     | 9100 | A9524     | *    |
| C9108     | 9108 | J3240     | 9108 |
| C9110     | 9110 | J9010     | 9110 |
| C9114     | 9114 | J2324     | 9114 |
| C9115     | 9115 | J3487     | 9115 |

\* Denotes a drug code that is packaged under OPSS; therefore, no separate payment is made for the drug.

\*\* Note that C9114 and C9115 are replaced by J2324 and J3487 but the descriptions are different. Refer to the complete list of pass-through drugs for payment information for those codes.

**New Pass-Through Drugs**

The following drugs have been designated as pass-through drugs under the hospital OPSS effective January 1, 2003:

C9120 Injection, fulvestrant, per 50 mg  
**Assigned APC: 9120.**

C9121 Injection, argatroban, per 5 mg  
**Assigned APC: 9121.**

J3315 Injection, triptorelin pamoate, 3.75 mg  
**Assigned APC: 9122.**

**Comprehensive List of Pass-through Drugs**

The following is a list of the drugs paid as pass-through drugs as of January 1, 2003:

A9700 Injection, Octafluoropropane, per 3 ml  
**Assigned APC: 9016.**

C9111 Injection, Bivalirudin, 250 mg per vial  
**Assigned APC: 9111.**

C9112 Injection, Perflutren lipid microsphere, per 2ml  
**Assigned APC: 9112.**

C9113 Injection, Pantoprazole sodium, per vial  
**Assigned APC: 9113.**

*Pass-Through Devices (continued)*

- C9116 Injection, Ertapenem sodium, per 1 gm vial  
**Assigned APC: 9116.**
- C9119 Injection, Pegfilgrastim, per 6 mg single dose vial  
**Assigned APC: 9119.**
- C9120 Injection, Fulvestrant, per 50 mg  
**Assigned APC: 9120.**
- C9121 Injection, Argatroban, per 5 mg  
**Assigned APC: 9121.**
- C9200 Orcel, per 36 square centimeters  
**Assigned APC: 9200.**
- C9201 Dermagraft, per 37.5 square centimeters  
**Assigned APC: 9201.**
- J0587 Injection, Botulinum toxin, type B, per 100 units  
**Assigned APC: 9018.**
- J0637 Injection, Caspofungin acetate, 5 mg  
**Assigned APC: 9019.**
- J2324 Injection, Nesiritide, pre 0.5 mg  
**Assigned APC: 9114.**
- J3315 Injection, Triptorelin pamoate, per 3.75 mg  
**Assigned APC: 9122.**
- J3487 Injection, Zoledronic acid, per 1 mg  
**Assigned APC: 9115.**
- J7517 Mychophenolate mofetil, oral per 250 mg  
**Assigned APC: 9015.**
- J9010 Injection, Alemtuzumab, per 10 mg  
**Assigned APC: 9110.**
- J9017 Injection, Arsenic trioxide, per 1 mg \$31.35  
**Assigned APC: 9012.**
- J9219 Implant, Leuprolide acetate, per 65 mg implan  
**Assigned APC: 7051.**

**Non-Pass-through Drugs Under OPSS  
Changes in Payment For Orphan Drugs**

Effective January 1, 2003, the following four codes will be excluded from payment under OPSS and be paid on a reasonable cost basis.

J1785 J0205 J0256 J9300

**APC for Rubidium-RB-82**

The following new code and APC will be effective January 1, 2003. This code was not previously paid as a pass-through drug or an otherwise separately payable drug.

- Q3000 Supply of radiopharmaceutical diagnostic imaging agent, rubidium RB-82, per dose  
**Assigned APC: 9025.**

**Changes in Payment of Influenza Virus and Pneumococcal Pneumonia Vaccine (PPV)**

Effective for claims with dates of service on or after January 1, 2003, payment for influenza virus and PPV vaccines and their administration provided in a hospital outpatient department, home health agency (HHA), and comprehensive outpatient rehabilitation facility (CORF) will change. Payment will no longer be made based on the outpatient prospective payment system (OPSS).

Payment will be based on the provider type. Hospitals (bill type 13x), and HHAs (bill type 34x) will be paid based

on reasonable cost for the vaccines and their administration. CORFs (bill type 75x) will be paid based on the lower of the charges or 95 percent of the average wholesale price (AWP) for the vaccine and under the Medicare physician fee schedule for the administration.

Influenza and PPV vaccines and their administration are not subject to deductible or coinsurance. The applicable CPT/HCPCS codes are 90657, 90658, 90659, 90732, G0008 and G0009.

**Important Notification to Providers**

Although the effective date of the change to the payment methodology for influenza and PPV vaccines and their administration is January 1, 2003, the system changes will not be implemented in January 2003. **As a result, claims submitted by hospitals, CORFs, and HHAs with dates of service January 1, 2003, through June 30, 2003, containing any of the CPT/HCPCS for the influenza and PPV vaccines and their administration, will be held and not processed until the system changes are implemented with the July 2003 release.**

Hospitals, CORFs or HHAs furnishing additional services that would be reported on the same claim as the vaccines furnished during January 1, 2003, through June 30, 2003 may wish to remove the vaccine and administration charges from the claim in order to receive payment for the remaining services. In this instance, an adjustment bill would need to be submitted to include the vaccine and administration charges after the July system release is implemented.

**Note:** Payment to all other providers for these vaccines will remain the same. In addition, payment for hepatitis B vaccine will also remain the same.

**Policy Affecting Payment for Drugs Under the OPSS**

In accordance with section 1861(s)(2)(B) of the Act and related Medicare regulations and program issuances, drugs and biologicals that are not usually self-administered by the patient are payable under the OPSS when furnished incident to a physician service. Under OPSS, Medicare makes separate payment for certain drugs and biologicals and packages payment for others into the procedure with which they are billed.

The fact that a drug has a HCPCS code and a payment rate under the OPSS does not imply that the drug is covered by the Medicare program, but indicates only how the drug may be paid if it is covered by the program.

Neither the OPSS nor other Medicare payment rules regulate the provision or billing by hospitals of non-covered drugs to Medicare beneficiaries. However, a hospital's decision not to bill the beneficiary for non-covered drugs potentially implicates other statutory and regulatory provisions, including the prohibition on inducements to beneficiaries, section 1128A(a)(5) of the Act, or the anti-kickback statute, section 1128B(b) of the Act.

**Drugs Treated as Supplies**

Certain drugs are so integral to a treatment or procedure that the treatment or procedure could not be performed without them. Because such drugs are so clearly an integral component part of the procedure or treatment, they are packaged as supplies under the OPSS into the APC for

*Pass-Through Devices (continued)*

the procedure or treatment. Consequently, payment for them is included in the APC payment for the procedure or treatment of which they are an integral part. Examples include:

- Sedatives administered to patients while they are in the preoperative area being prepared for a procedure are supplies that are integral to being able to perform the procedure.
- Mydriatic drops instilled into the eye to dilate the pupils, anti-inflammatory drops, antibiotic ointments, and ocular hypotensives that are administered to the patient immediately before, during, or immediately following an ophthalmic procedure are considered an integral part of the procedure without which the procedure could not be performed.
- Barium or low osmolar contrast media are supplies that are integral to a diagnostic imaging procedure.
- Topical solution used with photodynamic therapy furnished at the hospital to treat non-hyperkeratotic actinic keratosis lesions of the face or scalp.
- Local anesthetics such as marcaine, lidocaine (with or without epinephrine).
- Antibiotic ointments such as bacitracin, placed on a wound or surgical incision at the completion of a procedure.

Examples of cases where a drug is **not** directly related and integral to a procedure or treatment and would not be considered a packaged supply include:

- Cases where drugs are given to a patient for their continued use at home after leaving the hospital.
- In the situation where a patient who is receiving an outpatient chemotherapy treatment develops a headache, any medication given the patient for the headache would not meet the conditions necessary to be treated as a packaged supply.
- In the situation where a patient who is undergoing surgery needs his or her daily insulin or hypertension medication, the medication would not be treated as a packaged supply.
- Hospitals may not separately bill beneficiaries for items whose costs are packaged into the APC payment for the procedure with which they are used (except for the copayment that applies to the APC). Note that drugs treated as supplies should be reported under the revenue code associated with the cost center under which the hospital accumulates the costs for the drugs.

**OPPS Policy on Payment for the Unused Portion of a Drug**

Once a drug is reconstituted in the hospital’s pharmacy, it may have a limited shelf life. Since an individual patient may receive less than the fully reconstituted amount,

hospitals are encouraged to schedule patients in such a way that the hospital can use the drug most efficiently. However, if the hospital must discard the remainder of a vial after administering part of it to a Medicare patient, the provider may bill for the amount of drug discarded along with the amount administered. In the event that a drug is ordered and reconstituted by the hospital’s pharmacy, but not administered to the patient, payment may not be made under OPPS.

**Example 1:** Drug X is available only in a 100-unit size. A hospital schedules three Medicare patients to receive drug X on the same day within the designated shelf life of the product. An appropriate hospital staff member administers 30 units to each patient. The remaining 10 units are billed to OPPS on the account of the last patient. Therefore, 30 units are billed on behalf of the first patient seen and 30 units are billed on behalf of the second patient seen. Forty units are billed on behalf of the last patient seen because the hospital had to discard 10 units at that point.

**Example 2:** An appropriate hospital staff must administer 30 units of drug X to a Medicare patient, and it is not practical to schedule another patient who requires the same drug. For example, the hospital has only one patient who requires drug X, or the hospital sees the patient for the first time and does not know the patient’s condition. The hospital bills for 100 units on behalf of the patient, and OPPS pays for 100 units.

**Hospital Billing Instructions for Drugs with Status Indicator “K” or “N”**

In order to receive separate payment for any drug having a status indicator of “K,” hospitals must bill for the drug using revenue code 636 “Drugs requiring detail coding” and report the appropriate HCPCS code for the drug.

Hospitals should bill for drugs with status indicator “N” using any of the drug revenue codes that are packaged revenue codes under OPPS: 250, 251, 252, 254, 255, 257, 258, 259, 631, 632, 633, or under revenue code 636. Hospitals may but are not required to use HCPCS codes when billing for packaged drugs. (Revenue code 636 does require HCPCS coding.) Although hospitals are not required to report the HCPCS codes for these drugs, it is essential that hospitals bill charges for packaged drugs by including the charge for packaged drugs in the charge for the procedure or service for which the drug is used or as a separate drug charge. This is critical because the costs of the packaged drugs are used for calculating the hospital’s outlier and transitional corridor payments and used in the annual update of APC payments rates for the procedures and services with which the drugs are furnished. ❖
